2020 Election Coverage

Who Are The Real Election Deniers?

Cheat Coverage, Live on CNN & CBS

- https://youtu.be/yY61es0Vj_Y CNN Coverage, “we can’t say, we’re going to have to keep counting.” Until we get enough for Biden. Seriously.
- https://youtu.be/Q0MUd_V1Oa8 How they set you up with mail in ballots. Why they had to count them after the polls had closed. Nearly all were for Biden. Hmm. https://youtu.be/rOu9qzt7Yfg
- And why is it all the Republican counties in each swing state finish early, on time according to election law, and all the Democrat counties get to keep counting for days, in violation of election law? Because the Dems need to know how many votes to create to win the election!
- https://youtu.be/KIT9MD8ynQU And they even censored the sitting president when Trump sets them up by saying he won by a landslide when only legal votes are counted. Which was true as the military tracked all the legal (watermarked) ballots. It’s the cover up that gets you every time.
- https://youtu.be/WTBDeaWry4A watch the cheat unfold in the days following the election. When have we ever waited a week to get presidential election results? That doesn’t seem strange to you? Are you okay with that?

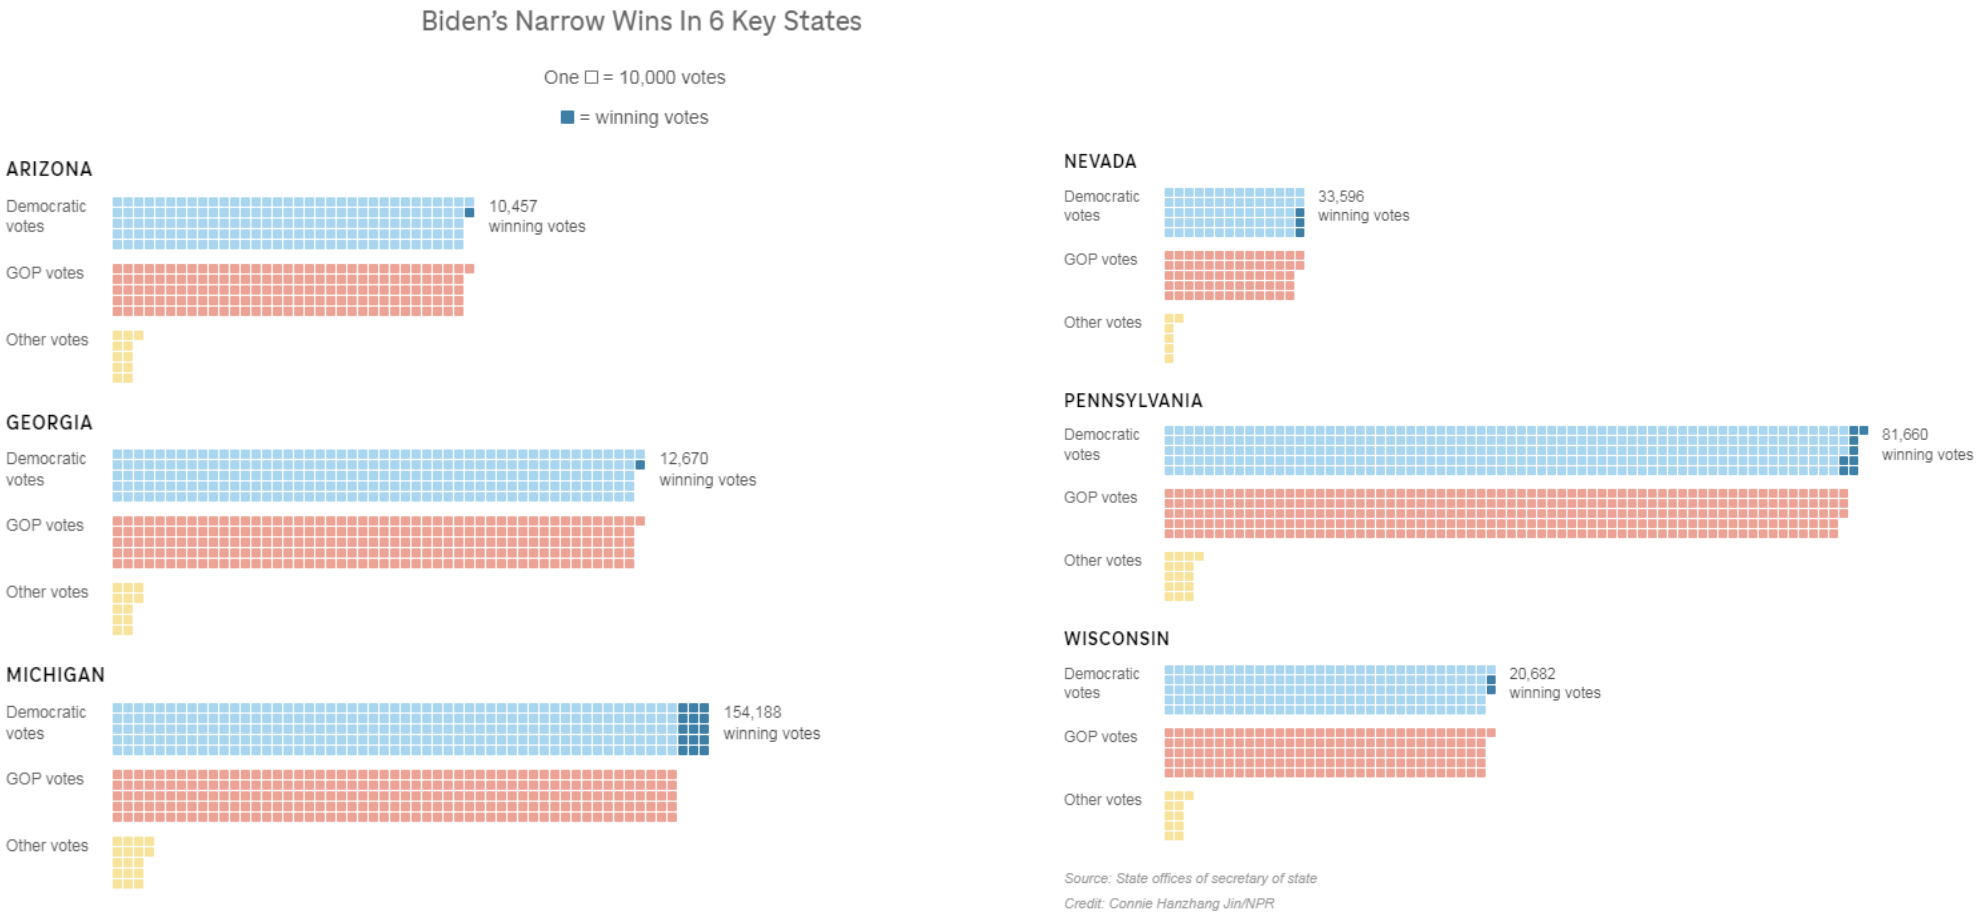

Aren’t Elections Supposed to Complete in a Day?

- https://youtu.be/rUqhPezFyrA Here’s the live CBS coverage, you can see the cheat in action as Biden needs impossible numbers of remaining vote to win each swing state.
- https://youtu.be/DHdmMwU7UrY The start of the day after election coverage showing you how they make you think it’s okay to continue to receive and count votes after the polls close. It is not okay! And no surprise, it’s always the blue counties that get to keep voting and counting until they get what they need. How stupid are people?
- https://youtu.be/Z_pWDBH1sI8 4 days later, they manufactured the votes needed and CNN declares Bidung president. That must mean it’s true. CNN is so on top of things and unbiased.
- https://youtu.be/imaYlHjhzEY Trump warns them to stop counting as, it is illegal. Hmm. I wonder what is going to happen to all the cheaters now? Foreign governments were involved in the cheat so, it was treasonous. What’s the penalty for treason again? Oh yeah, hanging, that’s right.
- https://youtu.be/b5P3xyCZ3Ws Trump doesn’t concede because the military counted the water marked ballots and know the Dems cheated. Trump remained Commander in Chief of The Republic, we’ve been under Marshall Law and they’ve been rounding up the cheaters ever since during his “shadow” presidency.

The Swing State Heist

Pennsylvania, Michigan, Wisconsin, Georgia, North Carolina & Some Others

The Best States Money Can Buy

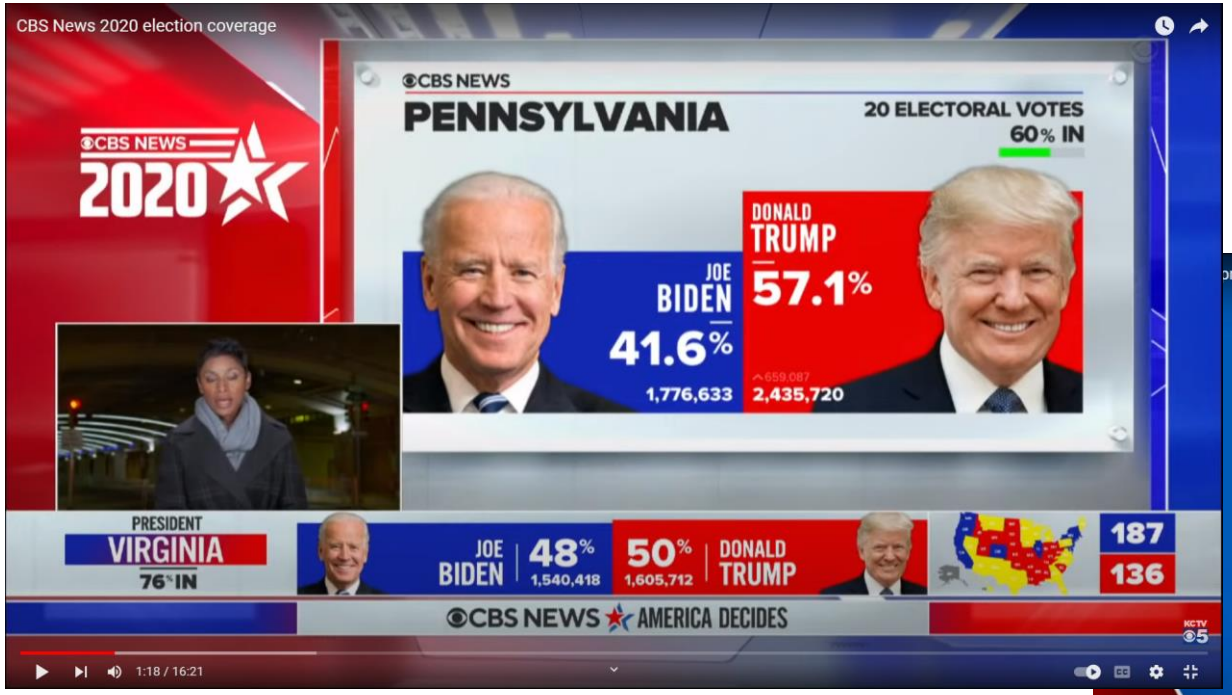

It Could Happen

So, before Trump was illegally censored from Twitter and other social media as a part of the election interference, he had over 80 million followers. At election time, Bidung had barely 20 million followers. So, we're expected to believe running from his basement with only 20 million Twitter followers he received the most votes of any president in history? Seriously? You buy that? Well, so did Bidung, bought every vote he needed. And by the way, Trump had several alias's on Twitter so, the faithful were able to continue to follow him without interruption. Best laid plans of the FBI, CIA, DOJ and the DC Swamp ruined.

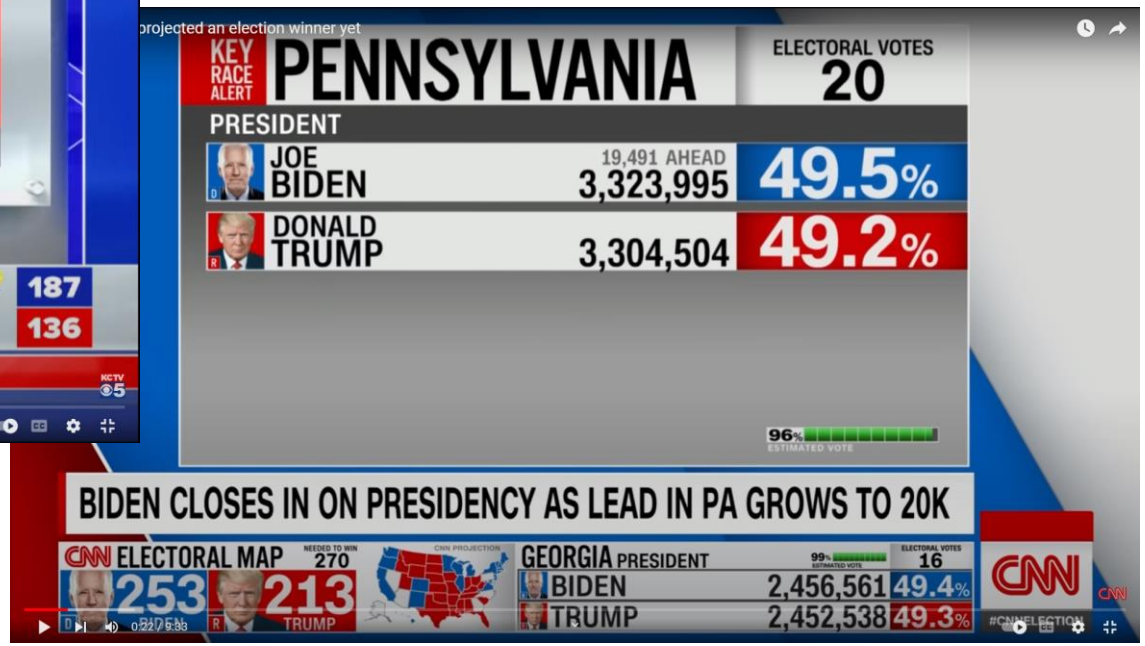

Pennsylvania

Election Day

4.2 million votes, 60% in, Trump leads by 700k votes, 57% to 42%. This means Bidung needs 61% of the remaining votes just to tie. No surprise he gets them 4 days after the polls close.

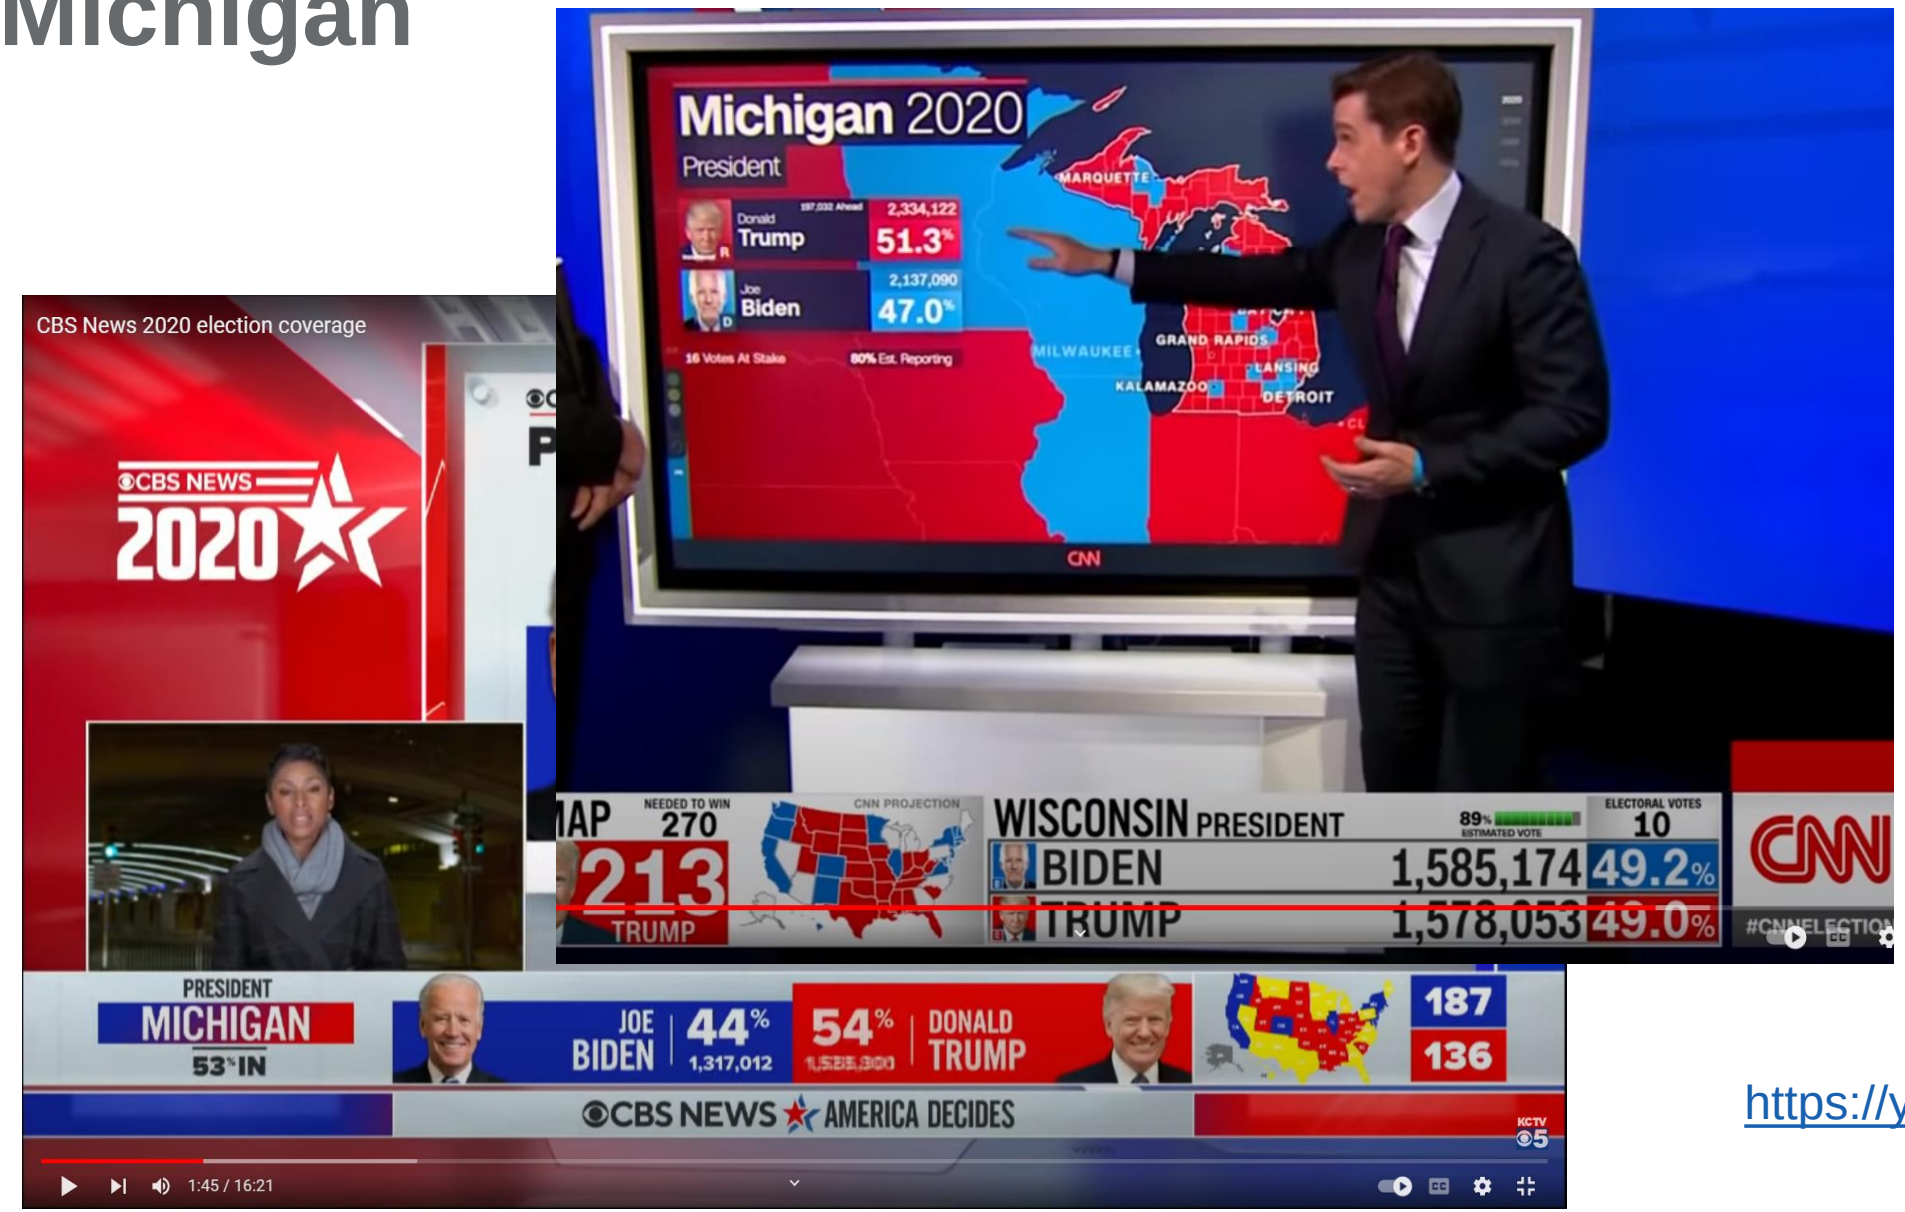

4 Days of Illegal Election Mail In Ballots & Vote Manipulation and, Wala!

https://youtu.be/5vaERx3B-bo

So, not only were they manufacturing votes for Bidung, they were taking away Trump votes. At 60% in, there were going to be 7 Million total votes yet, in the end, there were only 6.9 Million as they had to reduce Trumps vote count. They couldn't cheat enough by just adding Bidung votes.

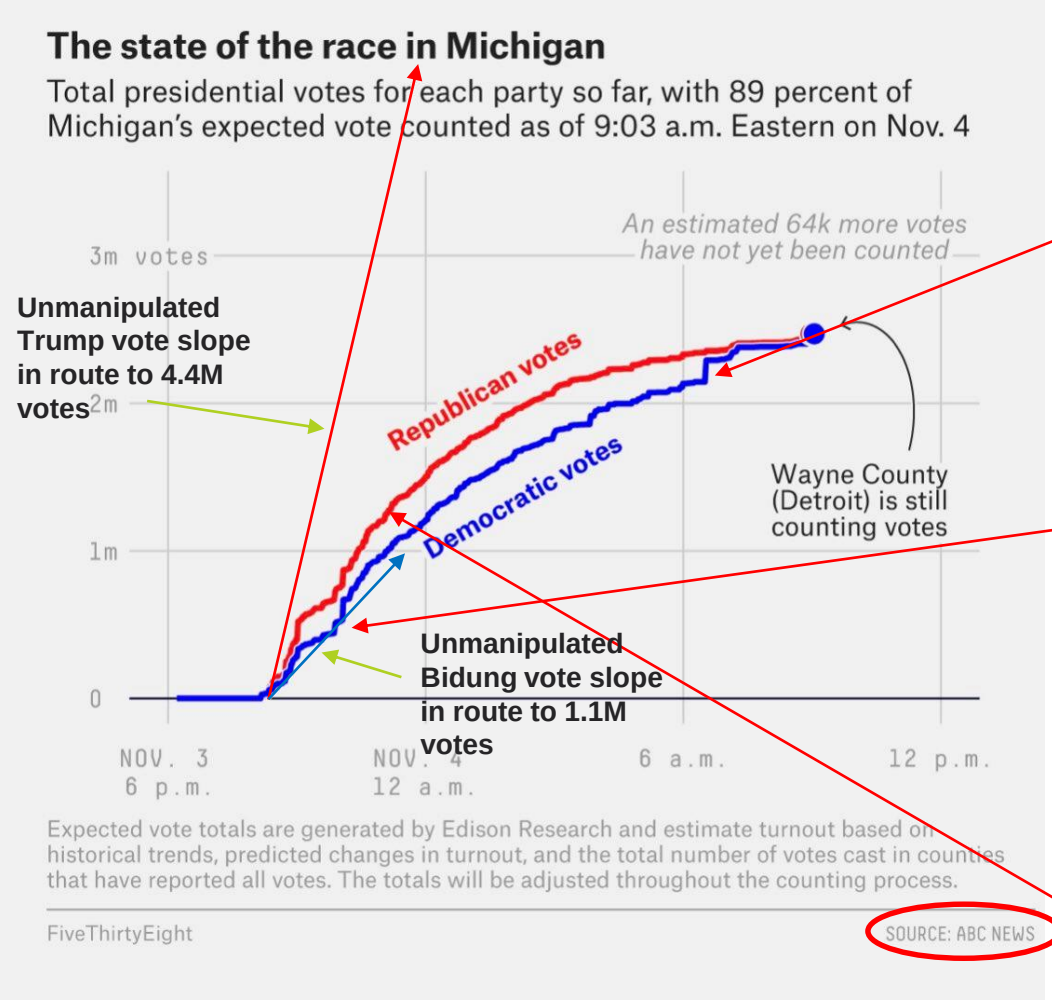

Michigan

So, with 53% of the vote in, 2.92 million votes, Trump leads by 300k, 54% to 44%. Bidung needs 62% of remaining 2.6 million votes to tie. At 80% in he narrows the gap of course by getting nearly 800k of the next 1.6 million votes counted. Trump gets only 700k as they again dropped another 100k of his votes.

https://youtu.be/rOu9qzt7Yfg

Michigan

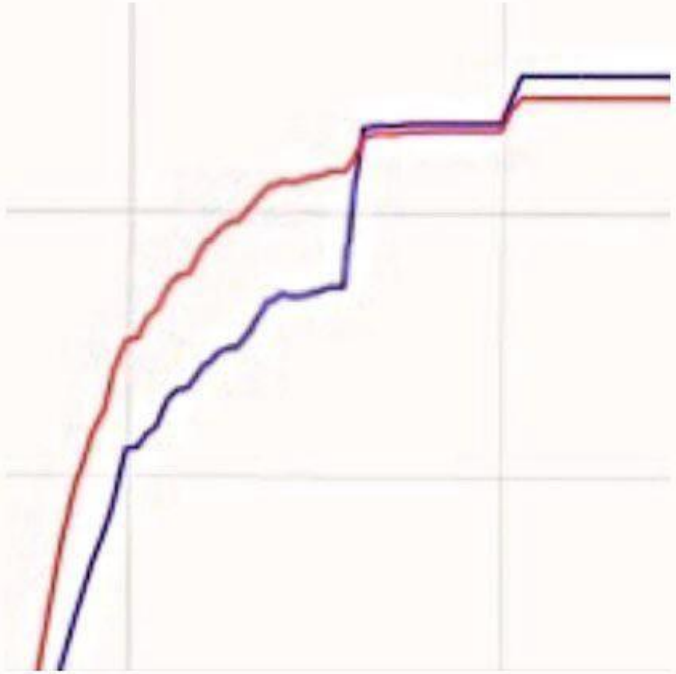

So, with 53% of the vote in, 2.92 million votes, Trump leads by 300k, 54% to 44%. Bidung needs 62% of remaining 2.6 million votes to tie. At 80% in he narrows the gap of course by getting nearly 800k of the next 1.6 million votes counted. Trump gets only 700k as they again dropped another 100k of his votes.

Fake mail in ballots arrive. This is statistically impossible. They salted a few Trump votes in here and there so they could say some of the votes were for Trump too.

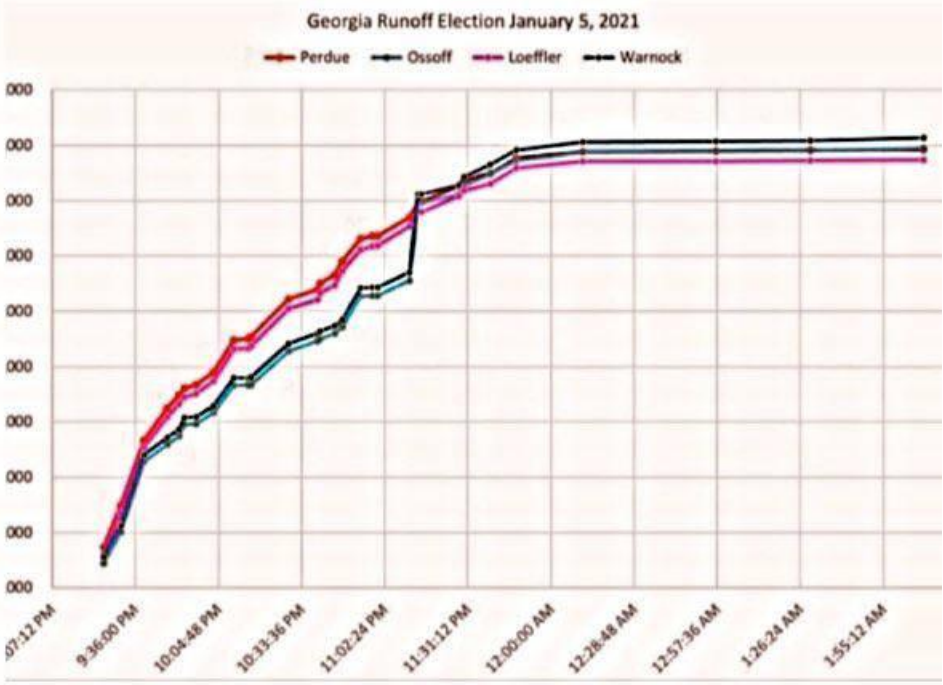

Here's where they realized the Dominion machine algorithms under shot by giving only 30% of every Trump vote to Bidung as Trump was destroying him by a landslide so, they adjusted the algorithm by another 12% to keep pace. It still wasn't enough. They had no choice but to close down the polls until they could truck in more fake mail in ballots.

A snapshot of Trump's tally at 10:30pm PST showed there were not enough outstanding votes left to be cast for Bidung to catch up so, they started manually removing votes from Trump while they waited for the fake mail in ballots. Hence the curve or instead of a straight line. Bidung's curves too since they're taking votes from Trump and his slope is tied to Trump's slope.

Venezuela Election Graph

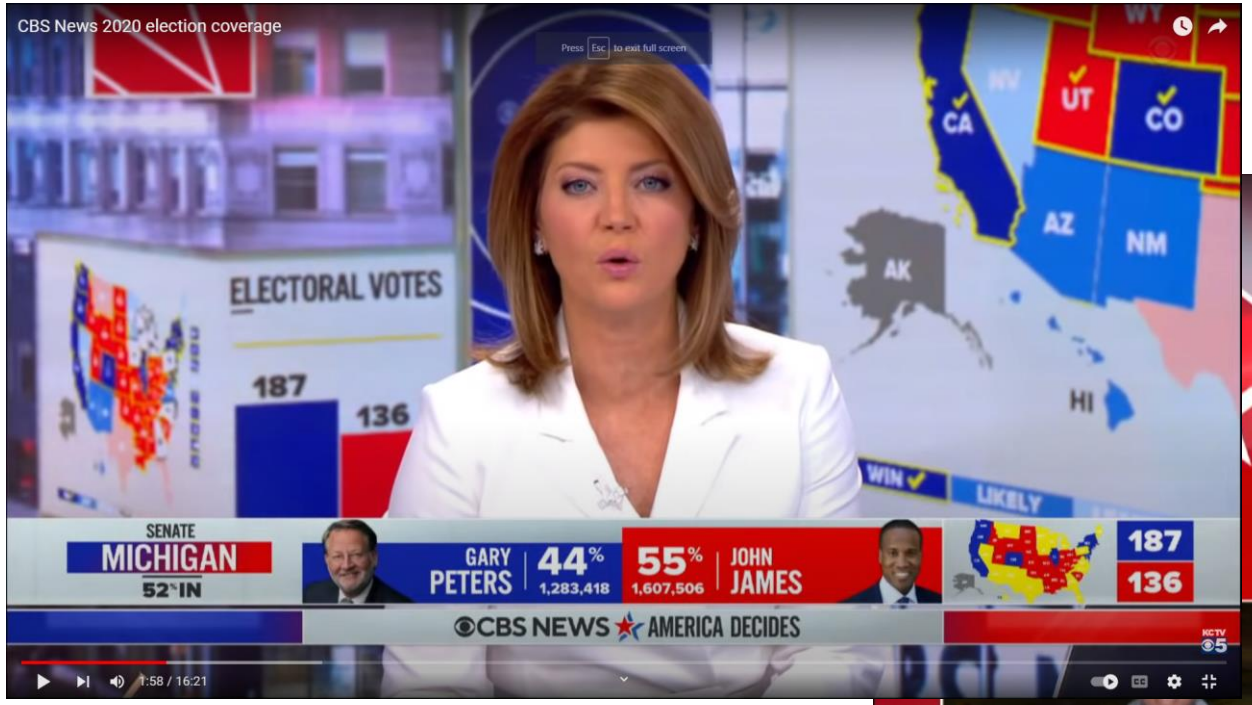

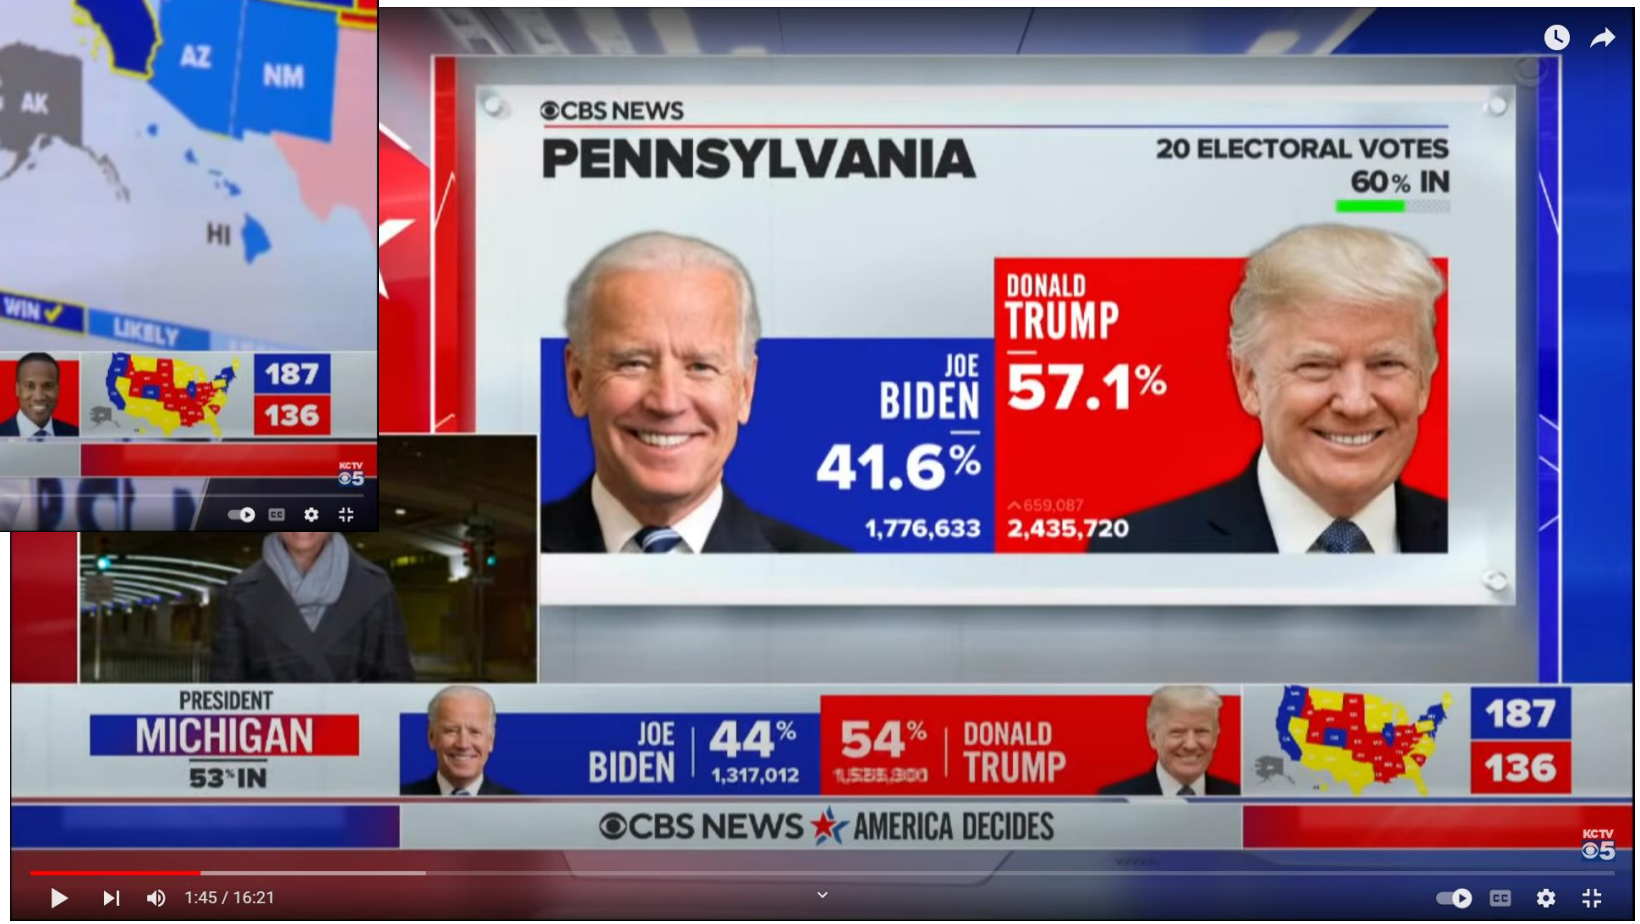

Georgia Election Graph

Michigan Senate Race

So, Michigan likes its Republicans, just not Trump? Trump is the Republican party. All whom he indorses win easily.

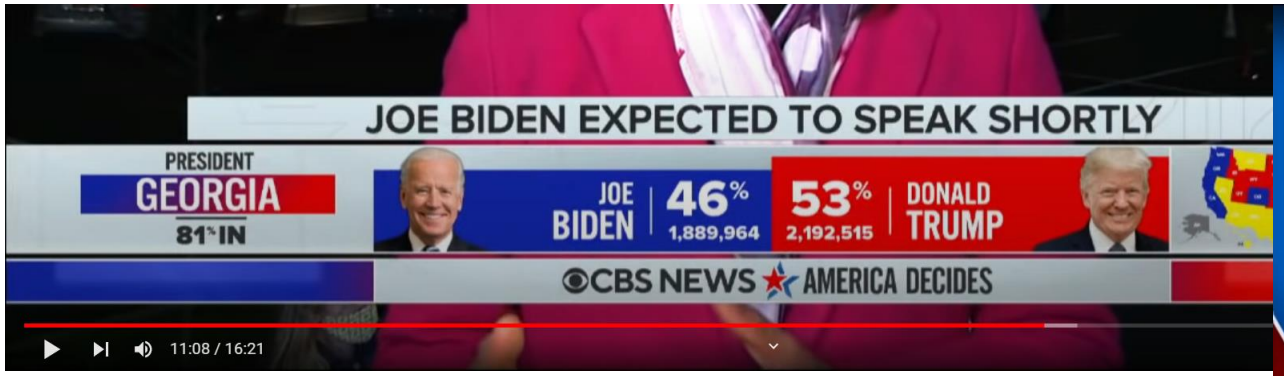

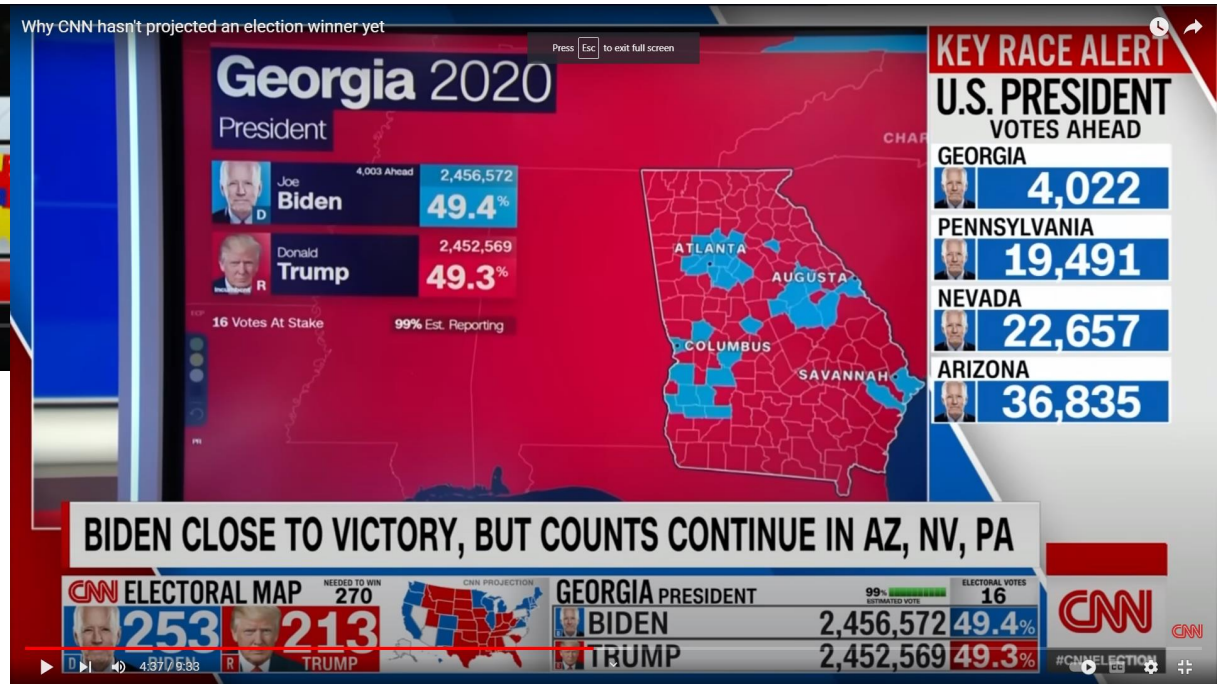

Georgia

Why does only the Bidung flip happen in swing states?

81% counted, 4.1 million votes in of 5.1 million votes. Trump leads by 303k votes, 53% to 46%. Bidung needs 82% or 783k votes of the remaining 960K votes to tie. But wait, he only goes up 570k votes to go from 1.89 million to 2.46 million and yet is now ahead of Trump who only went up 260k votes in the same time? So again, they took votes from Trump as the new total is only 4.9 million votes, and Bidung received 70% of the last 19% of the votes. Not enough and not possible.

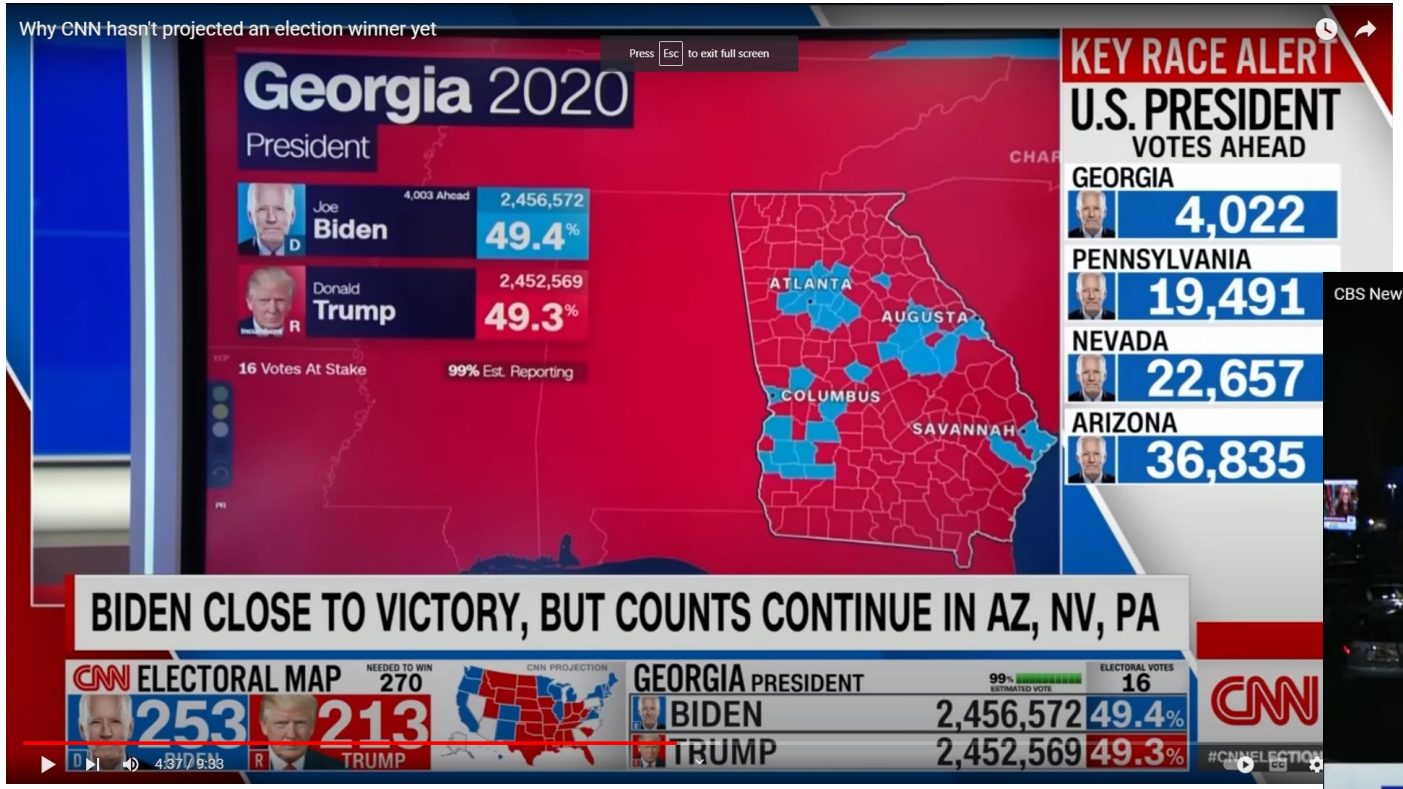

How obvious does this have to get?

https://youtu.be/5vaERx3B-bo

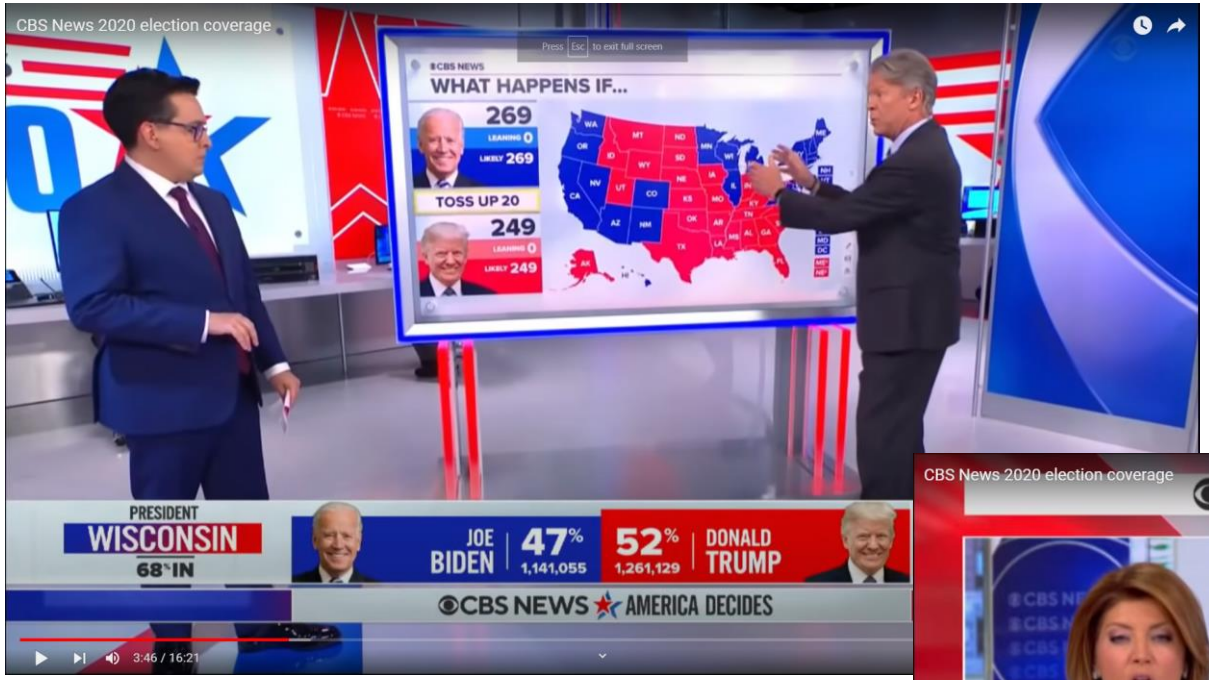

Georgia Senate

So Georgia loves their Republican Senator but, hates Trump?

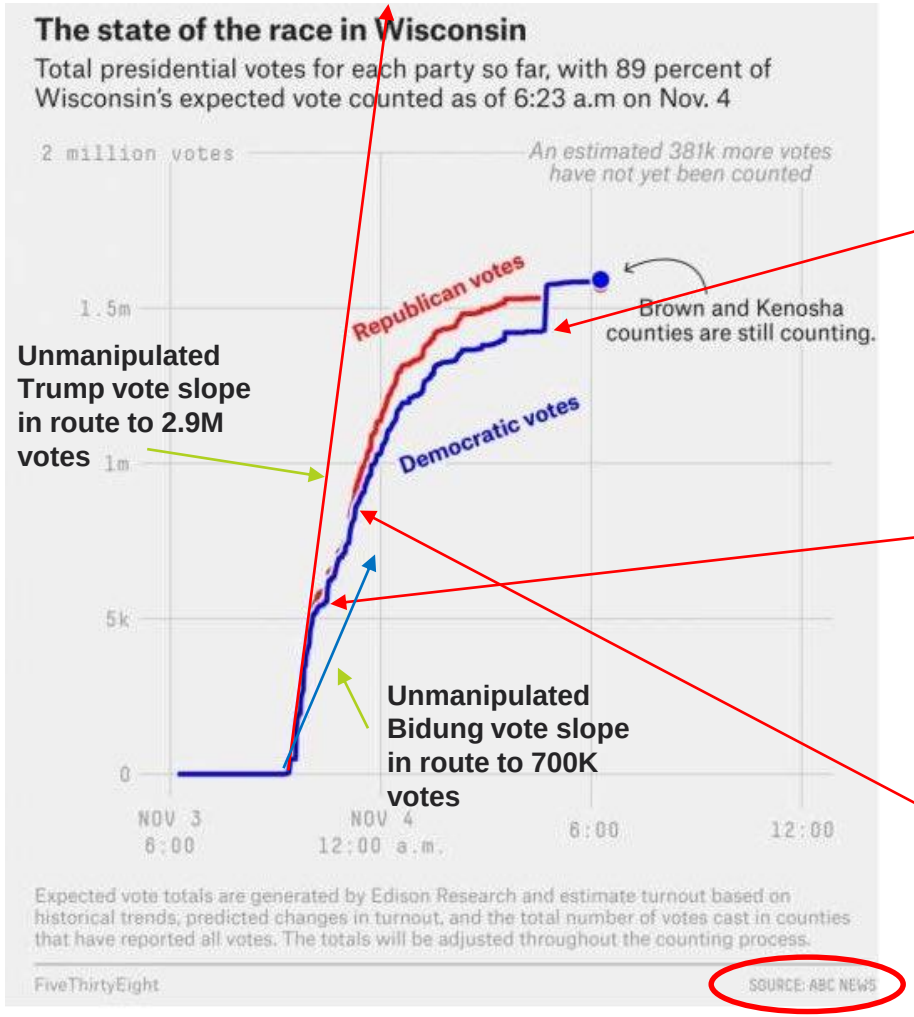

Wisconsin

With 70% of the vote in, 2.5 million, Trump leads by 120k votes, 52% to 47%. Bidung needs 60% of remaining 1 million votes to tie Trump. They counted long enough to make that a reality.

Wisconsin

With 70% of the vote in, 2.5 million, Trump leads by 120k votes, 52% to 47%. Bidung needs 60% of remaining 1 million votes to tie Trump. They counted long enough to make that a reality.

Fake mail in ballots arrive. This is statistically impossible. They salted a few Trump votes in here and there so they could say some of the votes were for Trump too.

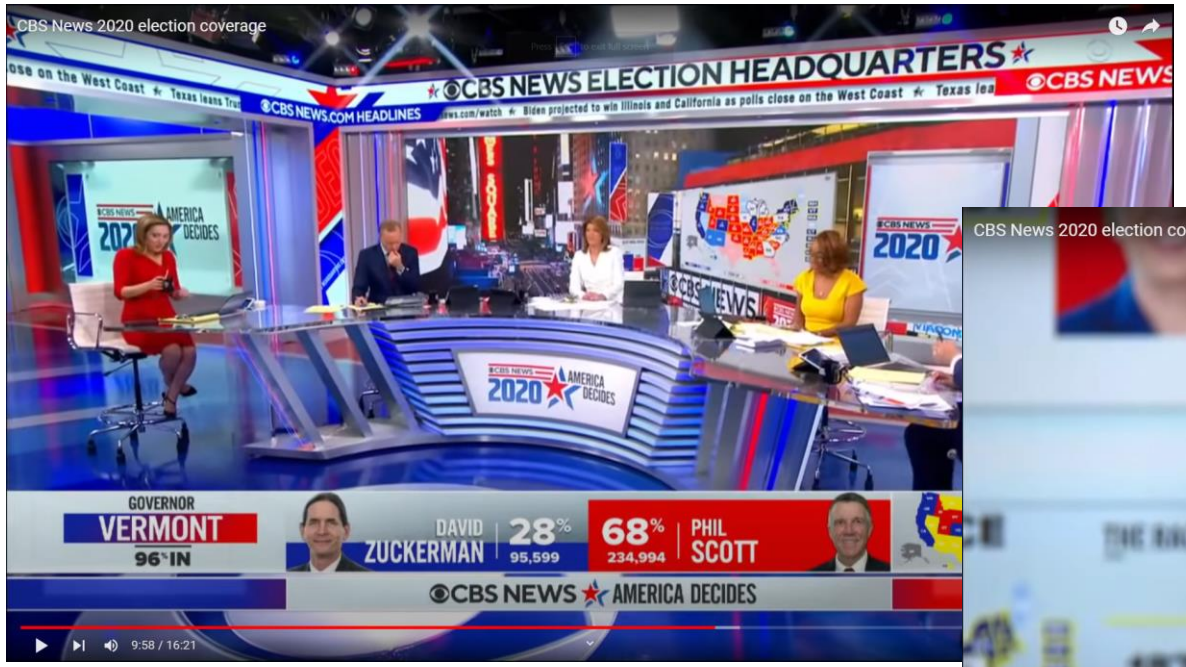

Here's where they realized the Dominion machine algorithms under shot by giving only 30% of every Trump vote to Bidung as Trump was destroying him by a landslide so, they adjusted the algorithm by another 12% to keep pace. It still wasn't enough. They had no choice but to close down the polls until they could truck in more fake mail in ballots.

A snapshot of Trump's tally at 10:30pm PST showed there were not enough outstanding votes left to be cast for Bidung to catch up so, they started manually removing votes from Trump while they waited for the fake mail in ballots. Hence the curve or instead of a straight line. Bidung's curves too since they're taking votes from Trump and his slope is tied to Trump's slope.

Hey wait, this is nearly identical to Michigan and all the other swing states. What a coincidence and how fortunate for Bidung.

Even Vermont Loves Their Repubs, Just Not Trump

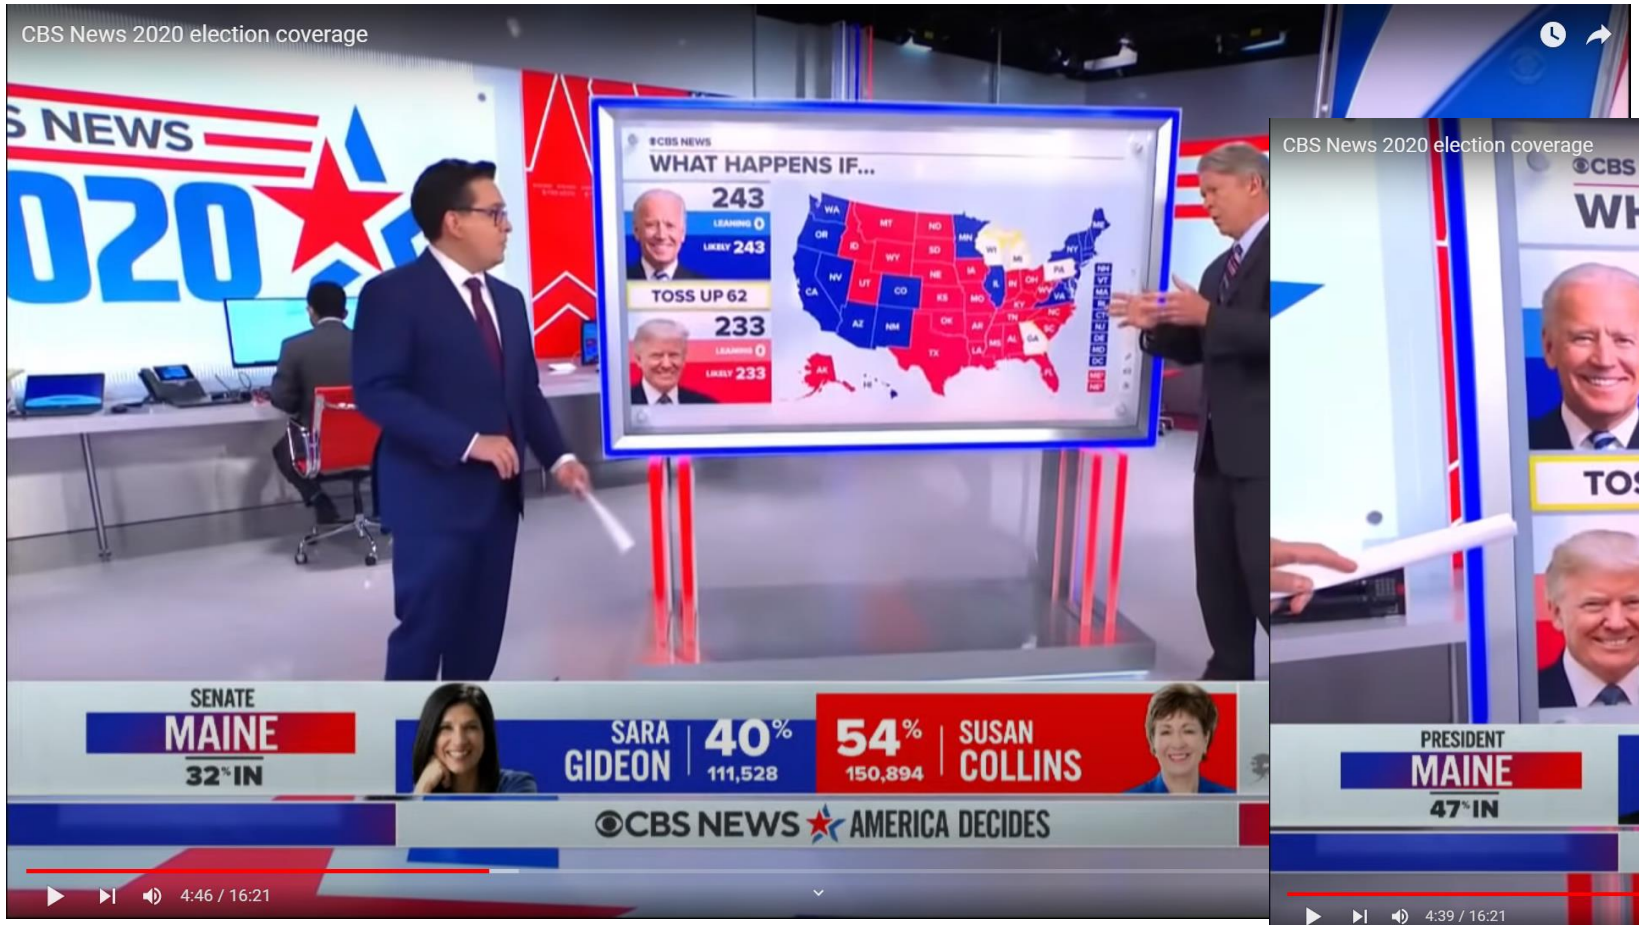

More Senate Repub wins w/ Trump loss.

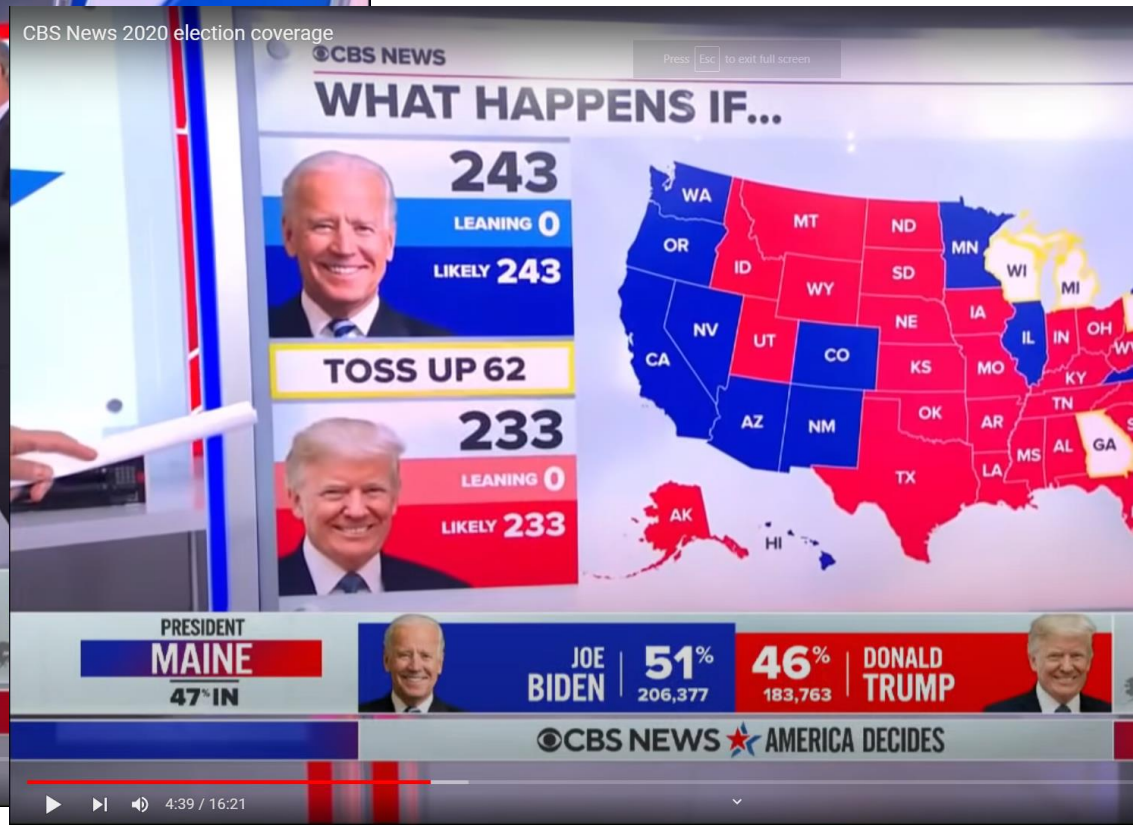

Trump Is The Republican Party Yet …

Repubs get decisive Senate victory in Maine yet, their president loses? What are the odds?

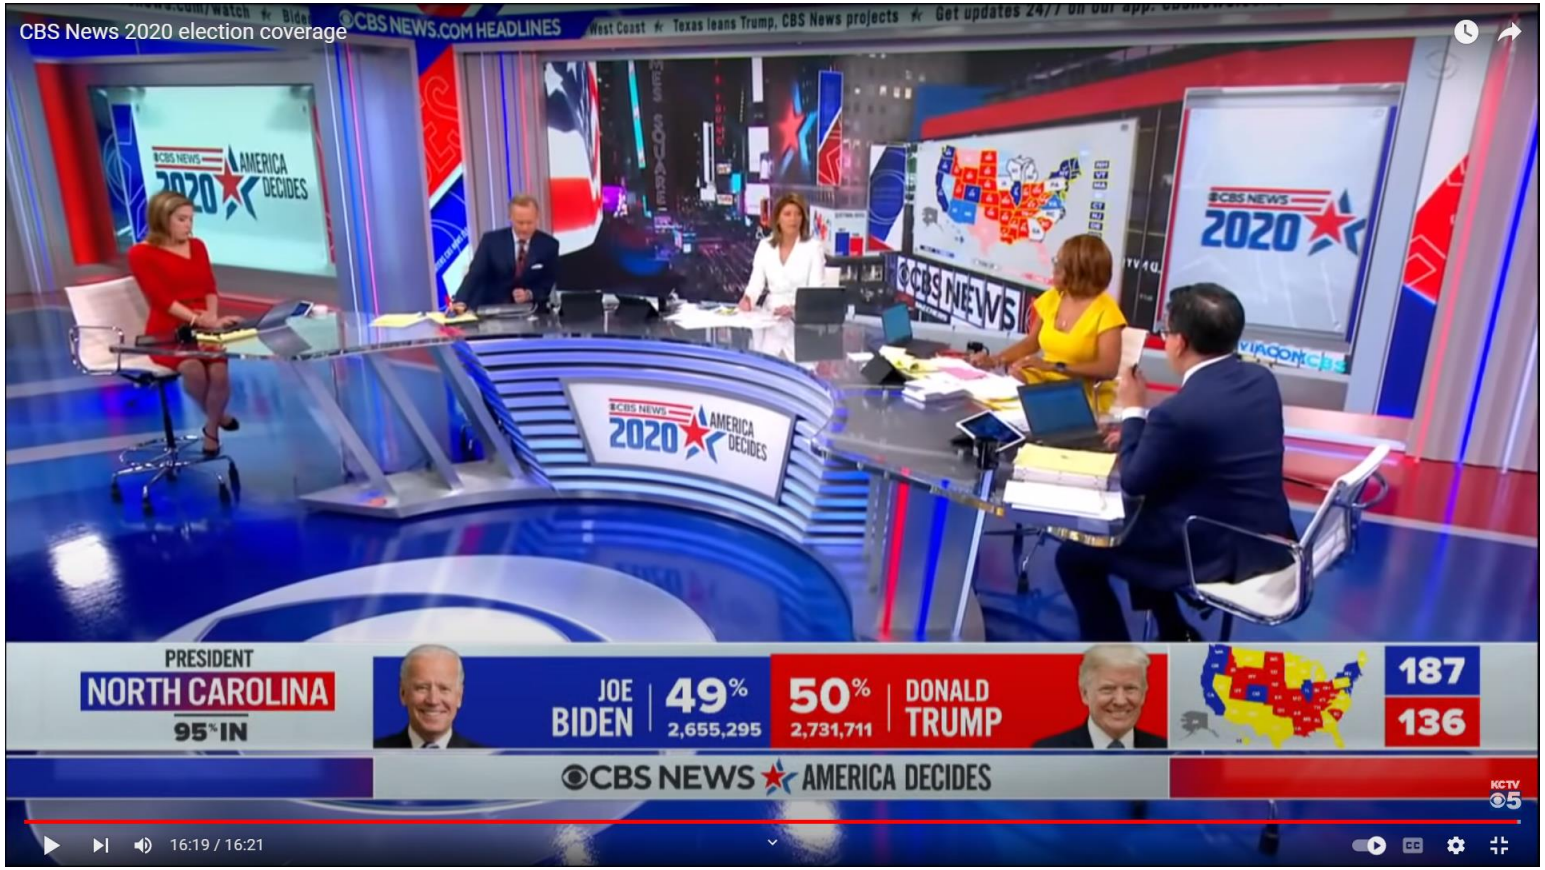

Maine Senate

Another example of Repubs killing it in the senate race but, Trump gets trounced. Hmm.

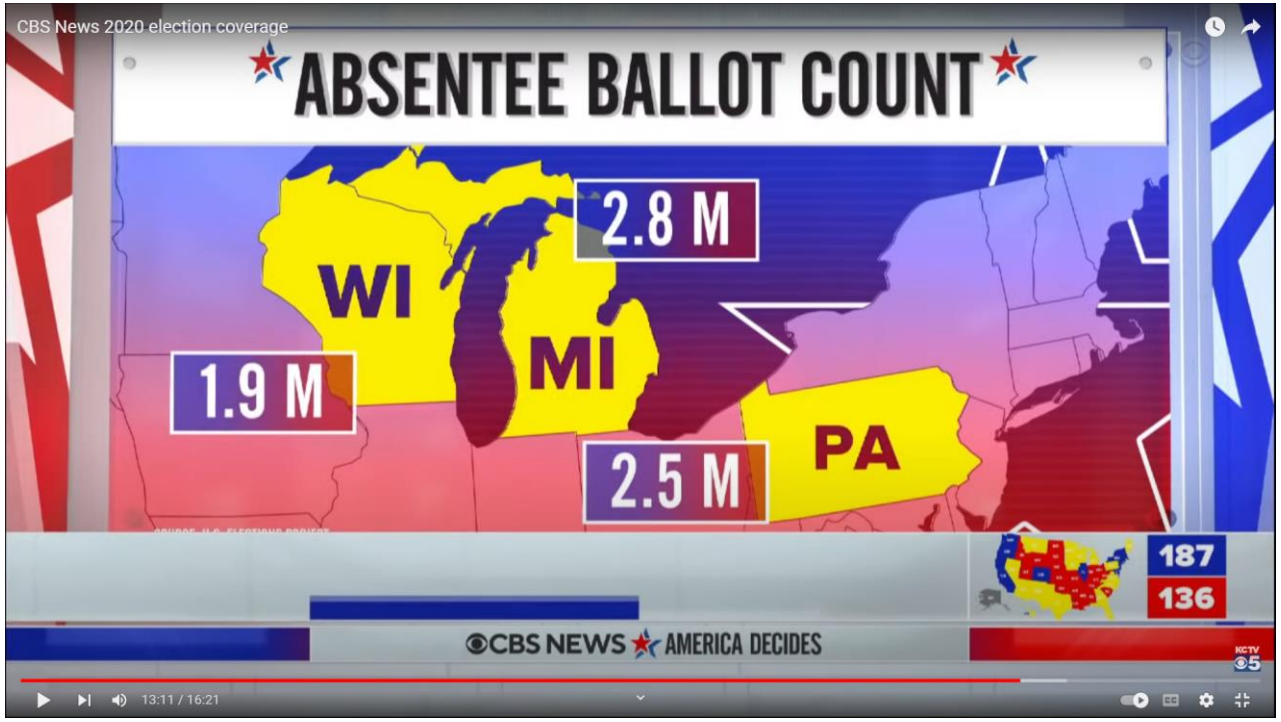

North Carolina

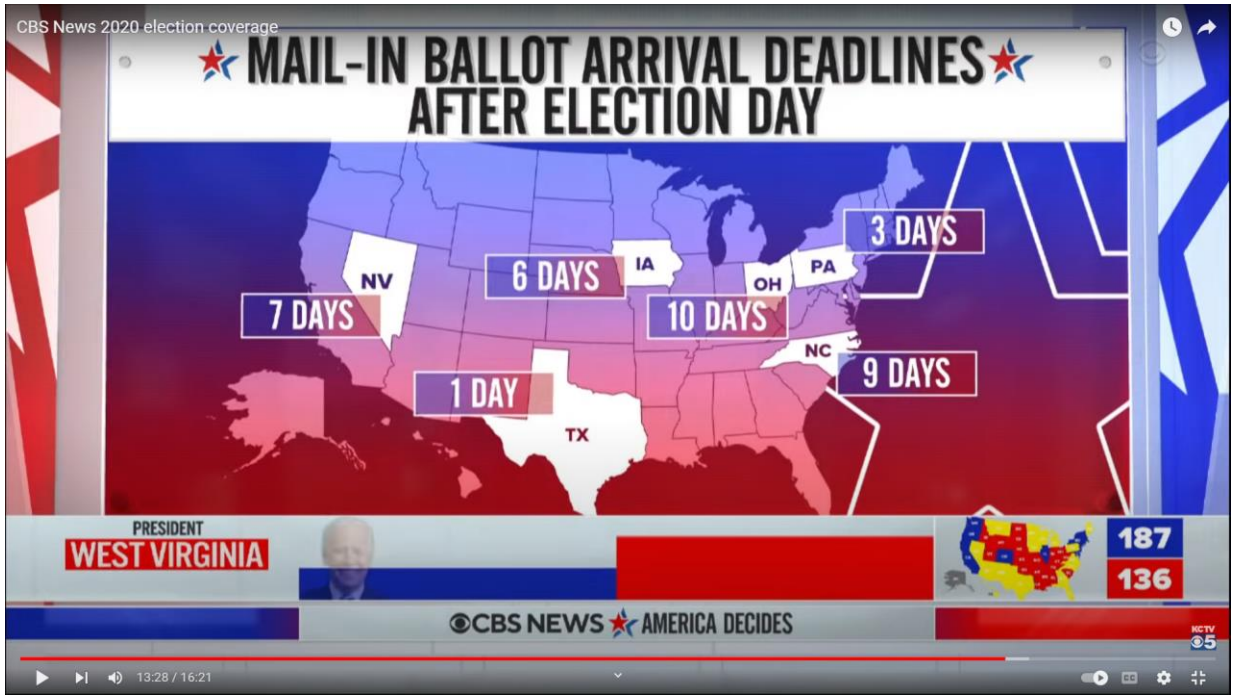

I wonder if they'll have time to create enough votes for Bidung in North Carolina? Of course they will.

Here’s Why, How Convenient for Bidung

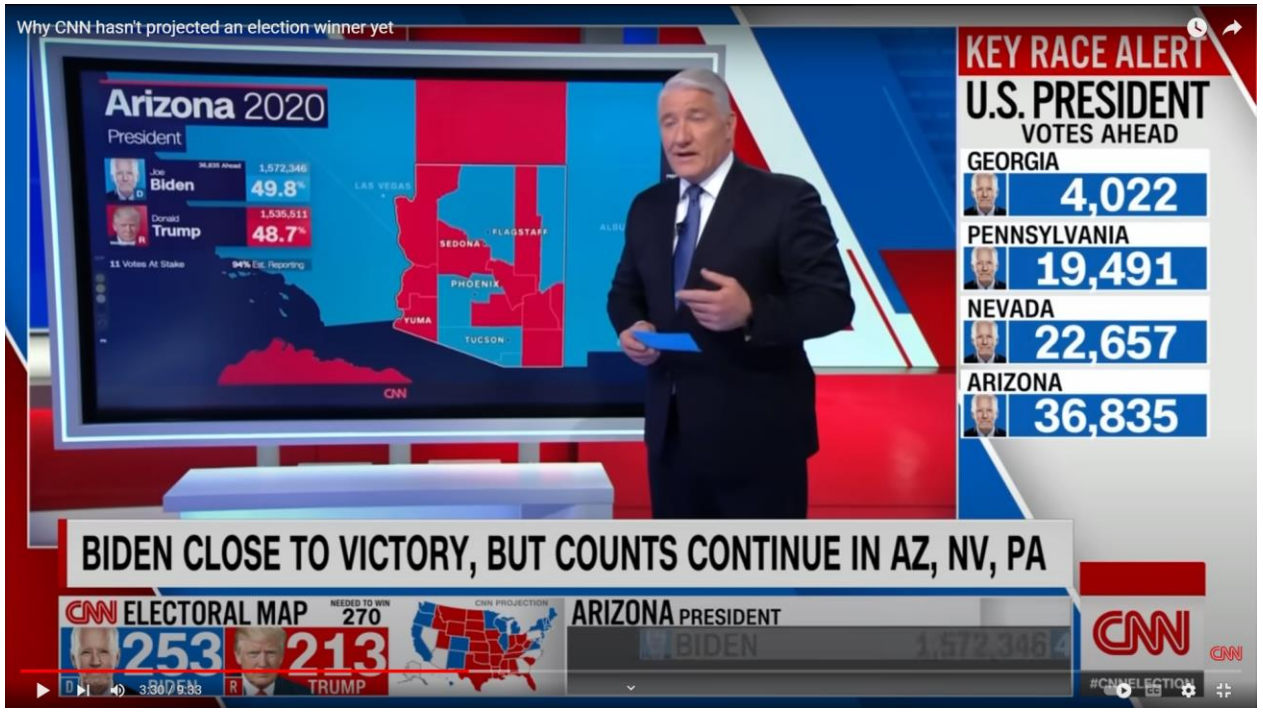

https://youtu.be/rUqhPezFyrA Here’s the live CBS coverage, you can see the cheat in action as Biden needs impossible numbers of remaining vote to win each swing state.

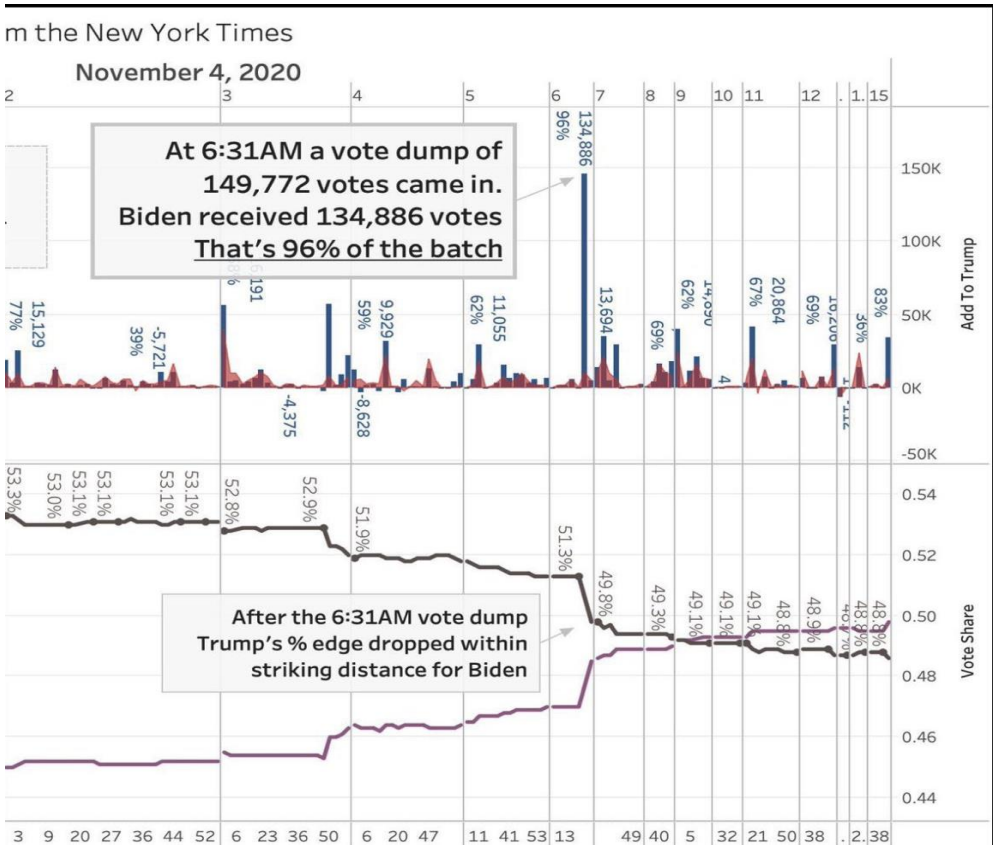

“It’s The Poor Score Keeper Who Doesn’t Always Win The Game”

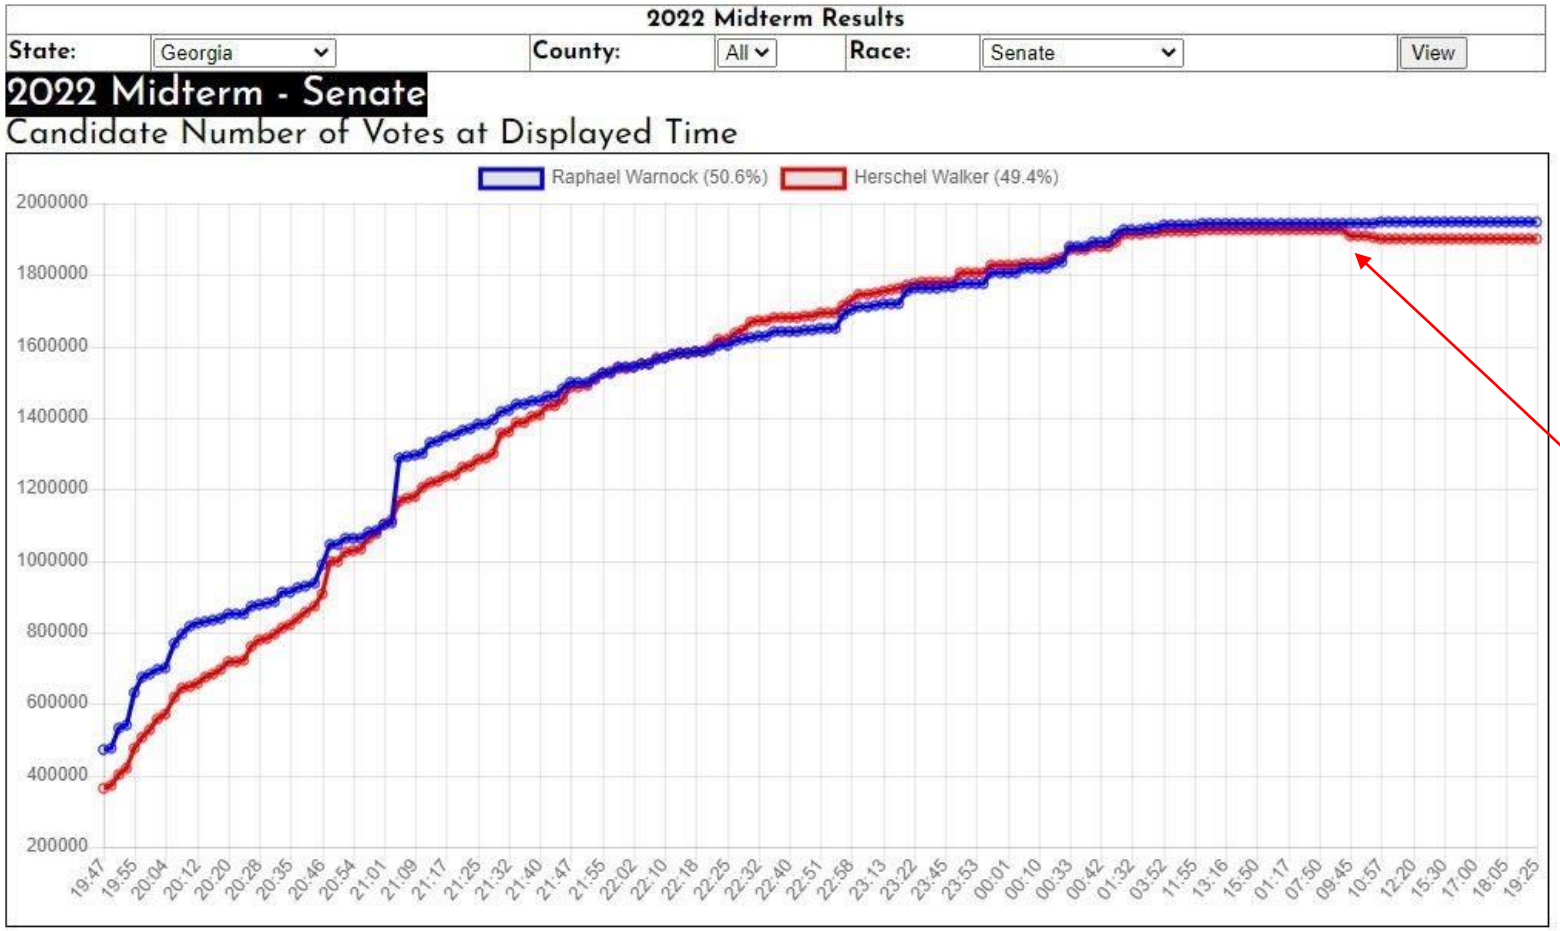

There's Always Just Enough When You Can Count Until You Get Enough

Wow, what a difference Dominion, unlimited days of mail in ballot voting, drop boxes, etc. make.

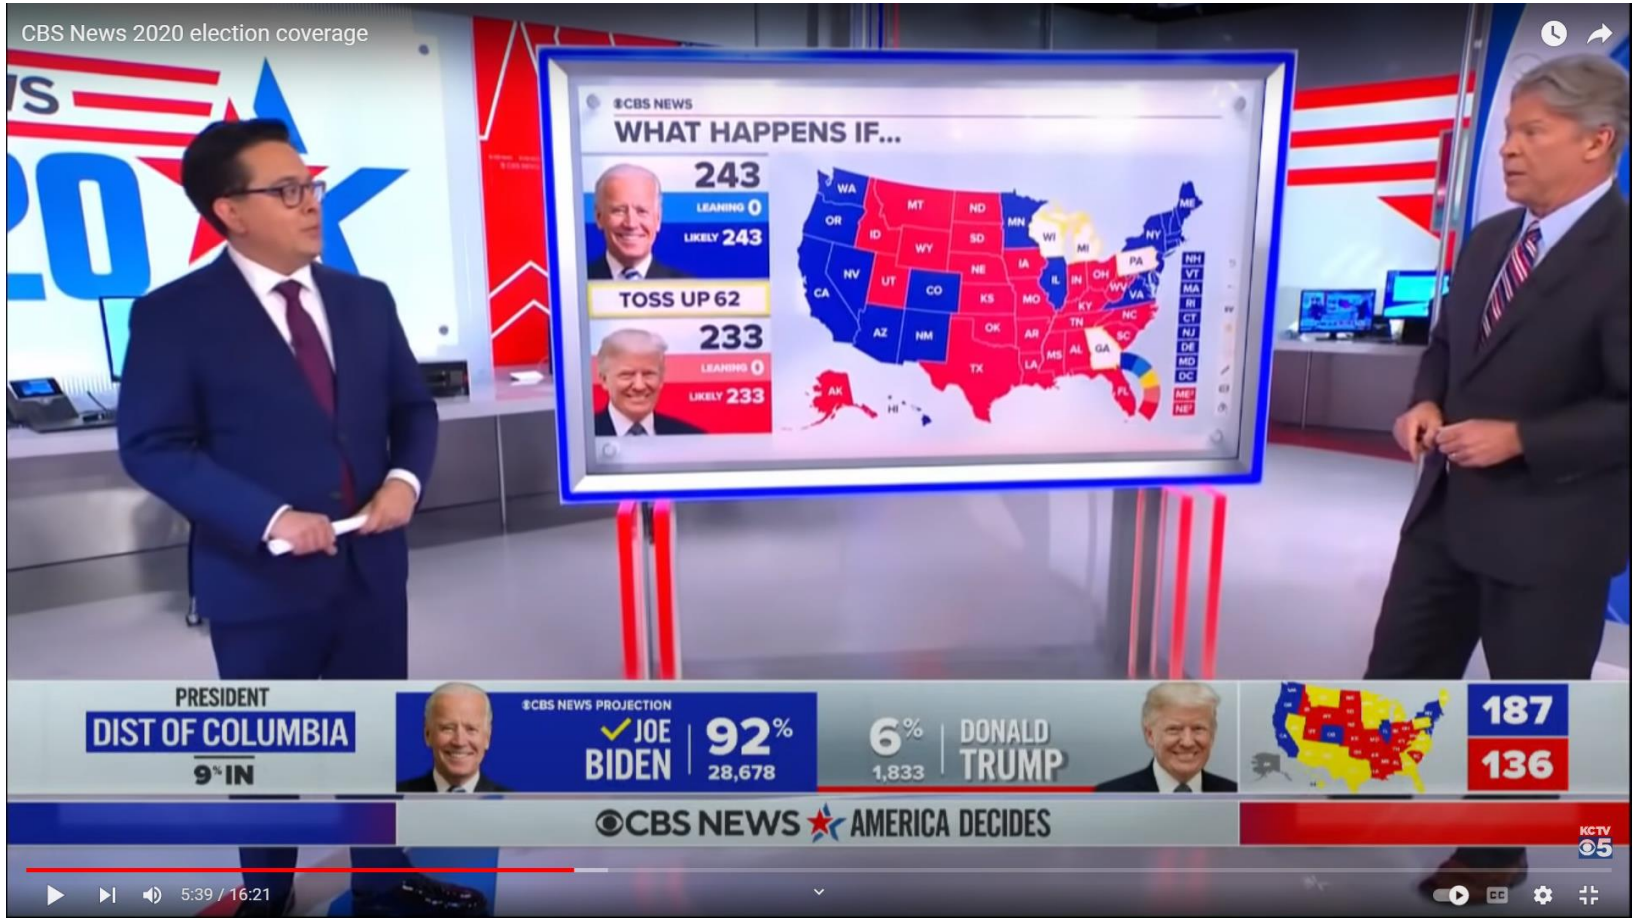

Hershel Walker Race

This is great, they underestimated the amount of cheating they would need during the election that they had to take votes away from the Republican final tally and couldn't mask it. Ignore the man behind the curtain. Idiots, like those who deny the cheating is happening.

Both Sides of The Swamp Hate Trump

The funny thing is, West Virginia loves Trump.

Deep State’s Factless Fact Check

Fact check: Vote spikes in Wisconsin, Michigan and Pennsylvania do not prove election fraud
By Reuters
November 10, 202011:05 AM PST Updated 3 years ago

Reuters Fact Check
Reuters Fact Check. REUTERS Purchase Licensing Rights, opens new tab
Social media users have been sharing posts claiming that during the night of Nov. 3 to Nov. 4 there were vote dumps of hundreds of thousands of mail-in ballots only for Democrat Joe Biden in Wisconsin, Michigan and Pennsylvania, suggesting this proves voter fraud allegations. These vote spikes did occur, but they also included Trump votes, accounted for largely left-leaning urban counties, and one state experienced a clerical error.

Report this ad
The posts (here; , here; , here; , here) appear to originate from a tweet (here) by Nick Adams, who describes himself as a bestselling author endorsed by President Trump (twitter.com/NickAdamsinUSA). The tweet, posted at 12:48 a.m. GMT on Nov. 5, 2020, says: “Between 3:40-4:30AM, they “found” 140,000 mail in ballots for Biden in Wisconsin. Between 3:30-5:00AM, they “found” 200,000 mail in ballots for Biden in Michigan. Between 2:00-4:00AM, they “found” 1,000,000 mail in ballots in Pennsylvania. All for Biden. None for Trump.” Comments and captions say, “Fraud!!”; “Fraud gone rampant”; “A fraud is a fraud.”

A spokesman for data analysis website FiveThirtyEight (fivethirtyeight.com/) told Reuters via email that the jumps in Michigan and Wisconsin were due to counties releasing large batches of results all at once and that the votes were not just for Biden. One large jump of almost 140,000 ballots in Michigan was due to a clerical error that has since been resolved. In Pennsylvania both the Trump and Biden campaign gained around 1 million votes on the night of Nov. 3 to Nov. 4.
Reuters has previously debunked claims that vote spikes prove Democrats are trying to steal the election in Wisconsin and Michigan (here).

Deep State's Factless Fact Check (continued)

WISCONSIN
The posts claim that 140,000 ballots for Biden were found in Wisconsin on the night of Nov. 3 to Nov. 4.
There was a jump in votes for Biden on the night of Nov. 3 to Nov. 4, but this was because Milwaukee County, home to the largest city in the states of Wisconsin, reported its 170,000 absentee votes, which were overwhelmingly Democrat (here).
Advertisement · Scroll to continue

FiveThirtyEight published a graph of the jump in votes in Wisconsin at 8:27 a.m. EST on Nov. 4 on its election live blog (here) alongside this explanation by reporter Maggie Koerth: "Biden was down in Wisconsin before the Milwaukee absentee results came in early this morning. The boost pushed him up past Trump, but the race in this state is still very, very tight."
FiveThirtyEight told Reuters that it is not true that Biden received all the votes in the overnight dump: "These batches were NOT 100% Biden votes; behind the blue line, there is also a red line representing the thousands of votes Trump gained. There are also counter examples, where Trump's line shoots up suddenly when a favorable batch of results are reported."

PENNSYLVANIA
The posts claim that there was a spike of 1,000,000 mail in votes for Biden in Pennsylvania on the night of Nov. 3 to Nov. 4.
The FiveThirtyEight election blog update at 8:29 a.m. EST on Nov. 4 by Dan Hopkins, which shows a graph of the Pennsylvania vote count on the night of Nov. 3 to Nov. 4 (here) does not show a dump of 1 million votes for Biden alone. Between 12 a.m. and 6 a.m. EST the graph says that both Trump and Biden's votes increased by approximately 1 million. The biggest increase was from midnight to 3 a.m. after which the tallies stayed very stable, not 2:00-4:00 a.m. as the social media posts suggest.

Deep State's Factless Fact Check (continued)

MICHIGAN
The social media posts claim that 200,000 mail in ballots for Biden were found in Michigan on the night of Nov. 3 to Nov. 4.
There was a jump in votes for Biden in Michigan of approximately 200,000 around 6:00 a.m. EST as shown in the FiveThirtyEight election blog update at 8:27 a.m. EST on Nov. 4 (here), which explains that this was due to a "tranche" of new votes from Wayne County, home to Detroit, where Biden led Trump at the time 67% to 32%.
FiveThirtyEight told Reuters this overnight vote increase in Michigan also did not solely consist of votes for Biden.
The spike in Democrat votes in Michigan was just after 6:00 a.m. EST, not 3:30-5:00 a.m. as the posts suggest.
There was also confusion over the Biden vote count in Michigan during the night of Nov. 3 to Nov. 4, when Biden received 153,710 votes in Shiawassee County, instead of 15,371, meaning his vote count jumped by much more than expected (here; , here).
Several social media users pointed out the jump in votes (archive.is/nQzbT , archive.is/bUjJb), including President Trump (here) . The tweets showed screenshots of the change in vote tallies on the elections map by Decision Desk HQ, an election data service (results.decisiondeskhq.com/), where Biden's count jumped from 1,992,356 to 2,130,695 while Trump's tally stayed at 2,200,902.
However, Decision Desk HQ explained in a Twitter thread that the jump in votes was as a result of a "clerical error" in Shiawassee County, where an extra zero had been added to Biden's vote tally here; . Decision Desk HQ updated its data to show that Biden received 15,371 votes in Shiawassee (here;

VERDICT

Partly false. The **vote spikes did occur**, but they were not only Biden votes and can be explained by pro-Biden county vote dumps and a clerical error. The timings of when ballots were received in Michigan and Pennsylvania are not accurate.
