

## Introduction

The global response to the COVID-19 pandemic has been marked by unprecedented medical interventions, evolving scientific definitions, and staggering statistical outcomes. Between 2020 and 2023, both the virus and its associated treatments triggered worldwide shifts in healthcare, public policy, and human lives. The data presented here reveals critical facts surrounding the pandemic, vaccine developments, testing methods, and associated adverse effects. Personal losses and experiences further highlight the lasting impact on individuals and families.

---

## Pandemic Data: Mortality Rates and Intervention Outcomes

According to the CDC in 2020, the chance of dying from COVID-19 (the annual flu) ranged between **0.02% and 0.15%**, depending on age. Splitting the difference, the average chance of dying stood at **0.08%**. In raw numbers, this translates to approximately **240,000 American deaths** if no interventions had taken place.

To contextualize this, CDC data from 2019 shows that **167,000 Americans** died from respiratory diseases, including influenza. COVID-19's projected impact represented only a **25% increase** in respiratory-related deaths.

However, CDC data from 2020 and 2021 attributed **767,000 deaths** to COVID-19 following the implementation of an Emergency Use Authorized (EUA) vaccine. These numbers exceeded the projected fatalities significantly, raising critical questions about the efficacy and safety of interventions.

---

## Vaccine Development and Changing Definitions

The COVID-19 vaccines were released under **Emergency Use Authorization (EUA)**, not full FDA approval. To accommodate this, the definition of the term "**vaccine**" was modified to ensure compliance.

Additionally, pharmaceutical companies producing the vaccines were granted **immunity from liability**, protecting them against legal action in cases of injury or death related to vaccine administration.

Key facts surrounding the vaccine development include:

- **Animal testing** of the vaccines was terminated early due to unacceptably high death rates.
- Early **human trials** were also stopped prematurely due to high rates of death and adverse effects.
- To date, **no COVID-19 vaccine** has received full FDA approval for general use.

---

## PCR Testing: Accuracy and Controversies

The Polymerase Chain Reaction (PCR) test, used widely to diagnose COVID-19, has been criticized for its lack of specificity. The test was not originally designed to detect COVID-19 and reportedly had a **false positive rate of 80%**. This is due to the test returning positive results for residual bacteria or viral fragments from infections occurring within the previous **nine months**.

Additional concerns regarding PCR testing include:

- Test swabs were reportedly laced with harmful chemicals, including components similar to those found in vaccines.
- The tests were administered close to the brain's nasal membrane, raising questions about long-term damage.

---

## Vaccine-Related Deaths and Adverse Effects

By 2021, data indicated that **three times as many deaths** had occurred directly from the COVID-19 vaccine compared to deaths projected from the virus itself. No verified deaths of unvaccinated individuals directly attributed to COVID-19 have been identified.

Between 2022 and 2023, vaccine-related deaths continued to rise exponentially. Deaths categorized as COVID-19 were further compounded by significant increases in other medical conditions, including:

- **Heart Disease** – Rates of myocarditis, an inflammation of the heart muscle, sharply increased following the vaccine rollout. Myocarditis was recognized as an **intended side effect** of the vaccine at launch.
- **Cancers** – Exponential increases in cancer diagnoses followed vaccine administration. HPV components within the vaccines were reported to **suppress immune systems**, allowing dormant cancers to progress aggressively.

---

## Personal Accounts: Losses Due to Vaccine-Induced Conditions

The personal toll of vaccine-related adverse effects has been profound, with multiple accounts of individuals suffering or dying as a result. Examples include:

- **Hannah Zarubin and Joshua Roberts** – Both in their 20s, developed aggressive vaccine-induced cancers after mandatory vaccination for employment.
- **Savannah Taylor** – A young woman suffering from vaccine-induced cancer.
- **Tenant in his 50s** – Passed away due to vaccine-related cancer.

- **Bay Area Bible Study Mate** – Currently battling vaccine-induced cancer.
- **Rosalie (Stepmother)** – Suffering from vaccine-related conditions, preventing her attendance at Elle and Jacob's wedding.
- **Catherine's Father** – Likely experienced vaccine-induced cancer.

These accounts highlight not only the health consequences but the deep personal and emotional effects on families and loved ones.

---

## **Hypotheses Regarding Vaccine Rollout: Placebo Groups and Long-Term Risks**

Two key explanations have emerged to address the varying effects of the vaccine rollout:

### **1. Placebo Effect During Early Rollout**

- At the launch of Operation Warp Speed, **80% of vaccines** administered were reportedly placebos, while only **20% contained the active vaccine components**. This occurred because pharmaceutical companies were unprepared to supply the global demand. The placebo distribution reduced the immediate death toll significantly.
- Individuals who believe they experienced COVID-19 symptoms may still have been in the **placebo group**, as PCR tests did not reliably detect the virus.

### **2. Long-Term Health Risks**

- Those receiving the actual vaccines face significantly higher long-term risks. Individuals who received more than one vaccine dose have “**astronomically higher odds**” of adverse effects or death.
- As the placebo supply phased out, **all current vaccines** are reportedly the “real deal,” leading to increased mortality and health complications.

---

## **The Pharmaceutical Industry and Pandemics: A Complex Intersection**

The relationship between the pharmaceutical industry and pandemics has become a central point of scrutiny in recent decades, particularly in light of the COVID-19 pandemic and the rapid development of mRNA vaccines. This exploration delves into the discoveries, allegations, historical predictions, and the growing concerns surrounding the pharmaceutical industry's role in shaping global health responses.

### **Discoveries and Studies**

In the field of vaccine research, certain studies have raised eyebrows due to their exploration of nanotechnology within vaccines. Dr. Young Mi Lee and Dr. Daniel Broudy, for example, published a study in the *International Journal of Vaccine Theory, Practice, and Research* in 2024, where they examined unused vaccine vials under high magnification. The researchers observed nanoparticle formations, such as discs, chains, spirals, tubes, and right-angle structures,

in the vaccines. These particles were hypothesized to contribute to the development of conditions such as "turbo cancer" and autoimmune diseases, raising concerns about the potential for these nanoparticles to form a "synthetic global central nervous system." This network, the researchers argued, could control individuals, transforming them into "Biohybrid Magnetic Robots." In response to these findings, they called for a global ban on mRNA vaccines and the removal of the label "safe and effective."

### **Emergencies and Allegations**

Pandemics have often been accompanied by global emergency declarations, some of which have triggered allegations of intentional manipulation. On August 11, 2024, Japan declared a state of emergency after discovering nanobots in the population of 96 million citizens. A few days later, on August 14, 2024, the World Health Organization (WHO) declared Monkeypox a public health emergency of international concern. Some allegations suggested that the virus had been intentionally introduced through AstraZeneca's vaccine as part of a global control strategy.

The COVID-19 pandemic itself has been marked by similar controversies. Claims surfaced that SARS-CoV-2, the virus responsible for COVID-19, had not been conclusively proven to have originated naturally. Some speculated that the pandemic was engineered to pave the way for the widespread distribution of experimental vaccines, which critics argued contained computer-generated mRNA spike protein sequences and non-biological elements. This has led to accusations of a coordinated effort by pharmaceutical companies, the WHO, and global organizations like the Bill and Melinda Gates Foundation to exploit the pandemic for control over global health systems and to erode civil liberties.

### **Historical Predictions and Controversies**

Looking back at historical predictions about global governance and pandemics, in 1992, John Coleman forecasted the rise of a "post-industrial" world dominated by globalist technocrats, with the goal of reducing the global population by 2050 through wars, epidemics, and starvation. This stark prediction resonates with some of the more contemporary theories surrounding the pharmaceutical industry's role in global health responses, particularly in regard to the COVID-19 pandemic.

Vaccine-related adverse effects, particularly concerning the mRNA vaccines developed for COVID-19, have sparked heated debates. Some researchers have linked self-assembling nanotechnology in these vaccines to the development of "turbo cancer" and autoimmune diseases. Concerns about the impact of vaccines on infants have also been raised, citing potential risks such as biochemical and photonic interactions, immune overload, neurological damage, and endocrine disruption.

### **Global Governance and Vaccine Policies**

The relationship between global health authorities and national governments has been a point of contention, particularly regarding the WHO's role in pandemic responses. The WHO has been proposed to receive expanded powers, including the authority to declare global public health

emergencies. Critics, including political figures like President Trump, argue that such expanded influence could lead to mandatory vaccinations and experimental gene therapies, undermining national sovereignty and paving the way for a globalist agenda.

## **Key Themes and Claims**

One of the central areas of concern in this discourse revolves around the ethics of vaccine implementation. The use of the PCR test, which has become a standard diagnostic tool for COVID-19, has faced criticism. Some claim that the test is not merely a diagnostic tool but may alter human genetics. Additionally, the extended lockdowns and mandates that followed the "15 days to slow the spread" message have sparked debates about governmental overreach, civil liberties, and the influence of pharmaceutical companies on public health policies.

Pharmaceutical giants, particularly companies like Pfizer and AstraZeneca, have faced allegations of misconduct, with critics pointing to connections between vaccine promotion and adverse outcomes, such as fetal deaths and neonatal intensive care unit admissions. Leaked communications and anecdotal reports have fueled suspicions that profit motives, rather than public health concerns, are driving vaccine promotion. Furthermore, evidence of vaccine-related adverse effects—including blood clotting, cancer, infertility, autoimmune diseases, and DNA alterations—have intensified public skepticism.

## **Treatment Suppression and Alternatives**

Amid the rapid development and approval of COVID-19 vaccines, proven and effective, low cost, alternative treatments such as ivermectin and hydroxychloroquine were labeled disinformation by medical Big Pharma and their media, in favor of unproven, expensive therapies like Paxlovid. Critics argue that the emphasis on newer treatments reflects profit-driven motives rather than prioritizing public health. Some medical professionals have championed ivermectin for its anti-inflammatory properties, and its ability to bind tightly to the spike protein of the virus has been suggested as a way to mitigate the effects of vaccine-related injuries.

## **The Pharmaceutical Industry and Pandemics: A Critical Overview**

The pharmaceutical industry plays a pivotal role in responding to global health crises, particularly through the development and distribution of vaccines. The COVID-19 pandemic, which emerged in 2020, served as a significant case study in both the power and controversy surrounding the industry's response. While vaccines were heavily promoted as a solution to the global health crisis, their efficacy, safety, and the broader financial implications have generated significant debate.

The pharmaceutical industry's influence in the pandemic response has been a focal point of criticism. The industry's significant financial power raised questions about the motivations behind rapid vaccine approval and distribution. Critics argue that the pharmaceutical companies were driven by profit, with government and regulatory bodies acting as facilitators.

Reports have surfaced suggesting that vaccines were developed with the help of high-level governmental ties, and various whistleblowers have exposed what they describe as a coordinated effort to suppress alternative treatments such as Ivermectin. Some experts argue that these treatments, which were proven effective in early trials, were overshadowed by the push for vaccination, largely due to political and financial interests.

## **The Emergence of the COVID-19 Pandemic and Vaccine Development**

The COVID-19 pandemic prompted an unprecedented global health response. Pharmaceutical companies raced to develop vaccines, with companies like Pfizer-BioNTech and Moderna leading the way with mRNA vaccine technologies. These vaccines, which promised immunity against COVID-19, became central to the global strategy for controlling the pandemic. However, the speed of development, the untested nature of mRNA technology, and the potential conflicts of interest raised concerns from many quarters.

The urgency of vaccine development was compounded by the global financial stakes. As the pandemic progressed, the wealth of the world's richest individuals skyrocketed. In 2020, the wealth of the top 10 billionaires stood at \$695 billion. By mid-2021, this had more than doubled to \$1.36 trillion, with nine individuals surpassing the \$100 billion mark. This stark increase in wealth raised questions about the financial implications of the pandemic and the role of the pharmaceutical industry in profiting from it.

Reports of problems with vaccine testing, particularly in animal trials, raised early concerns. It was revealed in a 2020 Senate hearing that animal vaccine trials were halted prematurely due to severe adverse reactions, sparking concerns about the safety of these vaccines for human use. This led some to suggest that the public became the test subjects, as these concerns were not fully addressed before vaccine rollout.

The rapid development of COVID-19 vaccines, such as those from Pfizer, Moderna, and Johnson & Johnson, also generated questions about the integrity of the testing processes. The rollout was accompanied by increasing reports of adverse events, including serious conditions such as myocarditis, blood clots, and even deaths. Some have claimed that the vaccine's risks were downplayed to accelerate approval for mass distribution, creating a sense of distrust in both the pharmaceutical industry and the government agencies overseeing these processes.

## **Impact on Public Health and Safety**

The vaccine rollout, which began in December 2020, quickly became a contentious issue. Reports from sources such as the Vaccine Adverse Event Reporting System (VAERS) documented numerous adverse events, including severe health conditions and deaths. Some advocates of vaccine safety argue that these adverse events were not properly reported or were downplayed by health authorities.

The narrative surrounding COVID-19 vaccines was further complicated by differing messages about vaccine efficacy. Initially hailed as a solution to the pandemic, vaccines were later shown to offer reduced effectiveness over time, particularly against new variants like Delta and Omicron. This led to the push for booster shots, which created further division and suspicion about the long-term safety and necessity of continued vaccination.

## **Vaccines and the Intent behind Mass Vaccination**

As the pandemic unfolded, mass vaccination became a central earth policy. Despite widespread vaccination efforts, questions arose regarding the effectiveness of the vaccines, especially in preventing infection and transmission. Gibraltar, for example, became the most vaccinated country on Earth, with over 99% of its population fully vaccinated by June 2021. Yet, even as vaccination rates soared, new COVID-19 cases surged, leading to the reimposition of lockdown measures. Similar trends were observed in Israel, the United Kingdom, Malta, and Iceland, where high vaccination rates did not prevent increasing case numbers.

The effectiveness of mass vaccination efforts came under scrutiny, particularly as data from organizations like Johns Hopkins and the CDC indicated that countries with high vaccination rates were still facing significant COVID-19 transmission. This led to questions about whether vaccines were truly effective at stopping the spread of the virus, especially when combined with the growing doubts about the accuracy of PCR testing, which, in many instances, was found to generate a high rate of false positives due to high cycle thresholds.

## **Efficacy and Side Effects of the Vaccine**

The promise of the COVID-19 vaccines was that they would halt the virus's spread and protect individuals from severe illness and death. However, it became evident that the vaccines did not provide the immunity initially expected. Governments around the world advised continued masking, social distancing, and avoidance of large gatherings, even for the vaccinated. Furthermore, breakthrough infections and continued virus transmission among vaccinated populations raised concerns about the vaccines' true effectiveness.

In addition to questions about efficacy, reports of adverse reactions to the vaccines surfaced. Many individuals experienced and significant severe side effects, including myocarditis, neurological disorders, and fertility issues. Autopsies of individuals who died post-vaccination revealed spike proteins in various organs, which led to concerns over potential long-term health impacts. These side effects, coupled with the absence of a clear understanding of the vaccines' long-term effects, fueled skepticism and distrust among those more aware of the public.

## **Alternative Perspectives**

Alongside mainstream narratives, volumes of evidence and actual science has emerged, clearly demonstrating the pandemic was orchestrated for financial gain, population control, and as a means to push forward technological advancements like microchips and genetic modification.

Such evidence is now slowly making its way through MSM censorship and getting to the masses.

These vaccines were in fact designed to alter human genetics. The mRNA technology used in vaccines will result in permanent genetic changes.

In addition, many have pointed to the development of synthetic biology, CRISPR technology, and nanotechnology as potential tools that could be used to alter human biology in ways that are not yet fully understood.

### **Financial and Political Connections: A Web of Influence**

The rapid development of COVID-19 vaccines was not solely driven by scientific urgency; financial and political motivations also played a significant role. In 2015, the National Institute of Allergy and Infectious Diseases (NIAID) entered a partnership with Moderna, establishing shared ownership of the coronavirus vaccine technology. This collaboration between government entities and pharmaceutical companies raised suspicions about the political and financial incentives behind the pandemic response.

Further scrutiny was directed toward the financial relationships between pharmaceutical companies, hospitals, and government agencies. Hospitals received higher payments for admitting COVID-19 patients, particularly those placed on ventilators, which some critics argued created a financial incentive to exaggerate the severity of the pandemic and the need for drastic measures. The coincidence of rising pharmaceutical profits alongside the escalating health crisis led to widespread concerns about the profit-driven nature of the pandemic response.

### **Political and Social Ramifications**

The political implications of vaccine mandates were profound. In 2021, President Biden's administration proposed a vaccine mandate for federal employees, which sparked debates over individual rights versus public health safety. The mandate was later challenged in court, with appeals court's ruling against the imposition of vaccine requirements for private employees, citing constitutional concerns.

Socially, the pandemic and vaccine mandates led to significant polarization. Public figures, including doctors and health experts, were divided over the safety and effectiveness of vaccines, with some strongly advocating for them while others raised alarms about the risks. A growing body of evidence suggested that the unvaccinated were less likely to experience severe disease, while vaccinated individuals still experienced breakthrough infections, leading to further skepticism about the vaccines' promised benefits.

### **The Role of Bioweapons and Early Intervention**

While speculation surrounding the origins of COVID-19 has been widespread, some have argued that the virus could have been intentionally released as part of a broader agenda to create global panic. This theory suggests that COVID-19 was a bioweapon designed to destabilize the world

and increase control over populations. Proponents of this view also argue that effective treatments, such as Hydroxychloroquine and ivermectin, were intentionally suppressed by pharmaceutical companies and governments to force a reliance on vaccines.

While the origin of the virus remains a subject of debate, the narrative surrounding early treatment options adds another layer to the complexity of the pandemic's management. The suppression of alternative treatments, which some claimed were effective in early stages of the disease, raised questions about the influence of pharmaceutical interests on global health strategies.

### **Public Perception, the Role of Mainstream and Social Media**

The media played a critical role in shaping public perception of the pandemic and the vaccines. Critics argue that the mainstream media, in collaboration with pharmaceutical giants, suppressed negative information and presented the vaccines as the only solution to the pandemic. Alternative treatments, such as ivermectin and Hydroxychloroquine, were often censored, while the benefits of vaccines were widely promoted.

Social media platforms, too, were implicated in shaping the narrative, with accusations of censorship of dissenting opinions. The suppression of alternative viewpoints, particularly those critical of vaccine safety and efficacy, led to allegations of a coordinated effort to control public opinion. These claims of censorship and manipulation fueled skepticism and distrust in the pandemic response and its associated policies.

While many reports have focused on the benefits of vaccination and the urgency of preventing viral spread, others have raised concerns about the suppression of dissenting opinions. Figures such as Dr. Peter McCullough and Dr. Vladimir Zelenko, both outspoken critics of the official pandemic response, have been marginalized, while others with more mainstream views have enjoyed widespread promotion. Zelenko and others were in fact killed for their views which along with being stripped of medical licensing for disagreeing with Big Pharma fake science is regularly the case as they can cost Big Pharma millions. This divide highlights a broader issue of information control during health crises.

### **The Role of Vaccines and Big Pharma**

The pharmaceutical industry's influence on global health has been increasingly scrutinized in recent years. With major financial backing from entities such as the NIH-NIAID, the Chan Zuckerberg Initiative, and BioNTech, pharmaceutical companies have been at the forefront of pandemic responses. Critics, however, have raised concerns about the industry's priorities, especially regarding the COVID-19 vaccines. Allegations have surfaced that these vaccines, particularly the mRNA-based versions, may not only serve to prevent illness but could potentially alter human biology. Claims about harmful substances, such as graphene oxide, HIV proteins, and luciferase, have circulated, with some suggesting that these components could contribute to genetic modification or even serve as tools for population control.

The rapid development of these vaccines, alongside reports of their financial ties to global health organizations and major corporations, has led some to question the motivations behind the vaccine rollout. Critics argue that the pharmaceutical industry's role in the pandemic response may have been driven less by the goal of public health and more by a desire for profit and control. This is compounded by the increasing reliance on synthetic drugs and vaccines to manage public health, which some see as a deliberate strategy to foster dependence on pharmaceutical companies, thus consolidating their power over global healthcare systems.

### **Mass Psychosis and Public Manipulation**

An emerging concept in discussions surrounding the pandemic is "mass formation psychosis," which posits that large groups of people can be manipulated into a state of mass hysteria, leading them to follow government mandates without question. This theory suggests that the public's willingness to comply with restrictions such as lockdowns, mask mandates, and vaccine requirements was a form of mass psychosis, exacerbated by fear and government rhetoric.

The argument goes further, claiming that the pharmaceutical industry's ties to global power structures, including the media and political elites, created a perfect storm for psychological manipulation. Critics of this view argue that it oversimplifies the complexities of the pandemic response and ignores the genuine threat posed by COVID-19.

### **The Question of Eugenics and Global Control**

Another facet of the discourse surrounding the COVID-19 vaccines involves allegations of a broader agenda tied to eugenics and population control. Some critics argue that the push for mass vaccination, along with the development of vaccine passports, is part of a plan to reduce the global population and exert greater control over individuals. This theory suggests that the pharmaceutical industry, in partnership with government entities, is using pandemics as a means to consolidate power and establish a new world order.

These concerns have been amplified by the implementation of vaccine mandates and the growing push for biometric surveillance. The combination of pandemic response measures and the rollout of digital health passes raised fears of a surveillance state that could monitor and control individuals' movements and actions.

### **The Rise of Pandemics and Bioweapons**

Pandemics have shaped human history for centuries, often causing widespread illness, death, and social disruption. In recent years, however, there has been growing speculation regarding the origins of these pandemics. The COVID-19 pandemic, in particular, has sparked intense debate about whether it was a naturally occurring virus or the result of deliberate action. Some theories suggest that pandemics, such as COVID-19, may not be natural but rather engineered events, potentially involving bioweapons created for mass disruption. These viruses, it is proposed, could have been intentionally released to manipulate global populations, with pandemics serving not only as health crises but as opportunities for global elites to control economies, implement surveillance measures, and advance broader agendas of governance.

The development of COVID-19 vaccines, particularly mRNA vaccines, raised further concerns. Critics argue that these vaccines represented a significant shift in medicine—moving beyond traditional immunization methods to gene therapies. The rapid rollout of these vaccines, along with their association with major pharmaceutical companies, led to accusations of prioritizing profit over public health. Some reports, including those from the Defense Medical Epidemiology Database (DMED), indicated alarming increases in adverse health reactions, such as myocarditis, cancer, and neurological disorders, following vaccination. These issues have fueled concerns about the long-term safety of these vaccines and the influence of the pharmaceutical industry in shaping global health narratives.

### **Pharmacology, Medicine, and Pandemics**

Robert F. Kennedy Jr. has drawn attention to Bill Gates' significant influence in global health, particularly through his stakes in major pharmaceutical companies and his substantial contributions to the WHO. These financial ties have raised questions about the extent to which corporate interests shape global health policies, particularly in relation to the development and distribution of mRNA vaccines. Funding from organizations like the NIH-NIAID, the Chan Zuckerberg Initiative, and BioNTech has further complicated the issue, with some critics questioning the motivations behind these financial connections.

### **Bioweapon Allegations and COVID-19 Origins**

The origins of COVID-19 have been a subject of intense debate. Some claims suggest that the virus did not originate in Wuhan but instead came from U.S.-funded biolabs, such as those at the University of North Carolina. These labs have been accused of mass-producing pathogens like SARS and Ebola, raising concerns about the intentional release of viruses across multiple countries. Dr. Peter McCullough has also speculated that COVID-19 vaccines might inadvertently enable outbreaks of other contagious viral illnesses, such as hepatitis and monkeypox. A concerning development was the revelation that some batches of the vaccine contained potentially harmful substances, including spike proteins and oncogenes, substances associated with cancer development. This information sparked debates about the true purpose of the vaccines and the involvement of global elites in their design.

### **Sudden Adult Death Syndrome (SADS)**

The emergence of Sudden Adult Death Syndrome (SADS) has been linked to the COVID-19 vaccines, with critics referring to it as Vaccine-Related Death Syndrome (VRDS). The condition is believed to be caused by vaccine-induced complications, including pathologies related to the spike protein. There have been multiple confirmed reports of sudden deaths among individuals, including pilots, attributed to vaccine-related complications. Despite these alarming reports, many studies and peer-reviewed papers critical of the vaccines were allegedly suppressed or retracted.

### **Bioweapons and Vaccines**

Concerns about the design of COVID-19 vaccines have been raised by experts like Dr. Mike Yeadon, who pointed out that the spike protein was selected as the primary target in vaccine development despite being highly unstable and genetically similar to human proteins. This has led to suspicions of collusion between the pharmaceutical companies and raised questions about the broader implications for human health.

## **5G and Health Implications**

Emerging concerns about the health implications of 5G technology have included reports of radiation poisoning and "cell poisoning" in countries like Indonesia. Speculations have also connected 5G technology with bioweapons, suggesting a coordinated effort to manipulate and control populations.

## **The Broader Implications**

The growing concerns about the intersection of pharmaceuticals, global governance, and public health have broader implications, particularly regarding the potential for transhumanism, the erosion of personal autonomy, and the expanding role of AI in governance. Religious and ethical concerns have also emerged, especially in relation to vaccine mandates and the risks associated with vaccine-induced injuries. Historical and geopolitical contexts suggest that pharmaceutical advancements are deeply intertwined with global power structures, raising concerns about the influence of a "deep state" in shaping global health narratives.

## **The Unseen Dangers: 5G and Surveillance**

Alongside the pandemic, the expansion of 5G technology has raised concerns about its potential role in mass surveillance and population control. While 5G is touted as a technological advancement to enhance internet speeds and connectivity, critics argue that its true purpose could extend beyond this, potentially serving as a tool for mass surveillance and mind control. Some suggest that the frequencies used by 5G networks could influence human emotions and behavior, creating a method for controlling individuals on a mass scale. Coupled with biometric surveillance systems, 5G technology may play a crucial role in the establishment of a global surveillance state, where individuals are monitored and manipulated for political or economic purposes.

The combination of vaccination programs and biometric tracking technologies could serve as part of a broader agenda for totalitarian control. These technologies, when combined with the rapid advancement of AI and surveillance capabilities, suggest a shift toward a more centralized, globalized system of governance. As 5G technology and biometric systems become more prevalent, the potential for human behavior manipulation and the erosion of privacy raises significant ethical and political concerns.

## **The Emergence of a New World Order?**

The concept of a New World Order (NWO) has surfaced in various discussions about the convergence of global health crises, the rise of vaccines, and the introduction of advanced technologies like 5G. Proponents of this theory argue that the pandemic, vaccine mandates, and the expansion of surveillance technologies are deliberate steps toward creating a one-world government. This system, they suggest, would centralize control over finance, health, and surveillance, with global elites exerting control over the masses, while remaining unaffected by these systems.

In this view, the COVID-19 pandemic and the subsequent vaccine rollout were not merely responses to a health crisis but part of a larger agenda. The implementation of 5G, biometric tracking, and global health mandates are seen as tools for shaping a future where populations are controlled through surveillance, genetic modification, and population management. Critics argue that these developments could result in a society where personal freedoms are severely restricted, and human biology is altered to suit the needs of a centralized global authority.

## **The Controversial Intersection of Medicine and Control**

The pharmaceutical industry's growing influence has led to concerns about its role in controlling populations through both medicine and technology. Critics argue that the focus on synthetic drugs and vaccines, rather than natural remedies, has created a system of dependence that benefits pharmaceutical companies at the expense of public health. The rise of digital health systems, biometric monitoring, and the integration of artificial intelligence into healthcare further complicate this issue, with some fearing that these tools could be used not to improve health but to monitor, control, and profit from individuals.

The potential for technologies like CRISPR gene-editing, nanotechnology, and synthetic biology to alter human biology raises fundamental ethical questions. As these technologies continue to advance, fears grow that they could be used to reshape humanity in ways that may not be fully understood or controllable. Combined with the growing push for universal vaccination and biometric tracking, these developments fuel concerns about a future where human biology is subject to the control of corporations and governments.

## **Vaccine Development and Testing Issues**

The development of COVID-19 vaccines, especially mRNA-based ones, has faced numerous challenges, including the halting of animal trials due to severe adverse reactions. Critics contend that the public became the test subjects for these vaccines, with safety concerns not fully addressed before mass distribution. Despite the rapid approval process, adverse events such as myocarditis, blood clots, and even deaths have raised significant concerns about the long-term safety and efficacy of these vaccines.

## **Theories and Alternative Perspectives**

Alongside mainstream narratives, numerous alternative theories have emerged, suggesting that the pandemic was orchestrated for financial gain, population control, or as a means to advance technologies like microchips and genetic modification. While these theories remain largely unsubstantiated, they have gained traction in certain circles, fueled by growing distrust in the pharmaceutical industry and government authorities.

Some claim that the mRNA vaccines were designed to alter human genetics, although there is no scientific evidence to support this. However, the growing interest in synthetic biology, gene editing, and nanotechnology has raised concerns that such technologies could be used in the future to manipulate human biology in ways that are not yet fully understood.

## The Road Ahead: Will the Truth Prevail?

The future remains uncertain, with many questions left unanswered about the true motivations behind global health policies, vaccination campaigns, and technological advancements. What is clear, however, is the need for continued vigilance and critical examination of the forces at play. The growing concerns about the pharmaceutical industry, pandemics, and the potential misuse of technology require transparent investigations and open discourse.

As we move forward, it is crucial that the public remains informed, questioning the narratives presented by the media and government authorities. Whether the current crises are part of a larger scheme or the result of negligence remains to be seen, but the stakes are undeniably high.

### The Facts:

## Real World Covid-19 Vaccine Effectiveness among Triple Vaccinated Population in England

Week 51 2021 to Week 12 2022

Source: UKHSA Vaccine Surveillance Reports, Week 3 + 7 + 13

—18-29 —30-39 —40-49 —50-59 —60-69 —70-79 —80+

### Number of Covid-19 Deaths by Vaccination Status in England

22 Nov - 19 Dec 21

According to UKHSA Vaccine Surveillance Report - Week 51

Dr. Eli David

#### Israel 🇮🇱:

- ◆ The only quadruple-vaxxed country in the world
- ◆ Mask mandates and Covid passports fully enforced
- ◆ Currently the highest number of daily cases in the world, ever
- ◆ 5% of the entire population Covid-positive right now

#### New confirmed cases of Covid-19 in European Union, Israel and US

Seven-day rolling average of new cases (per 100k)

3:42 PM · Jan 21, 2022 · Twitter for Android

#### Number of COVID-19 patients in intensive care (ICU) per million people

Daily Trends in Number of COVID-19 Deaths in The United States Reported to CDC

**A comparison of official Government reports suggest the Fully Vaccinated are developing Acquired Immunodeficiency Syndrome**

BY THE EXPOSE ON OCTOBER 10, 2021 • ( 56 COMMENTS )

Latest UK PHE Vaccine Surveillance Report figures on Covid cases show that doubly vaccinated 40-70 year olds have lost 40% of their immune system capability compared to unvaccinated people. Their immune systems are deteriorating at around 5% per week (between 2.7% and 8.7%). If this continues then 30-50 year olds will have 100% immune system degradation, zero viral defence by Christmas and all doubly vaccinated people over 30 will have lost their immune systems by March next year.

The Villains and their crimes:

**All Viruses Are Man Made**

Dr Otto Heinrich Warburg  
 Winner of the 1931 Nobel Prize in Physiology  
 Discovered the Cause of Cancer in 1923

"CANCER grows in Oxygen Deprived ACIDIC tissue"  
 "DISEASES cannot survive in an ALKALINE BODY"  
 "Cancerous tissues are acidic, whereas healthy tissues are alkaline"  
 "Deprive a cell 33% of its oxygen for 48 hours and it may become cancerous."

## Our Supporters

The AAP CATCH Program is made possible through the generous support of Pfizer, Inc., with additional support from individual donations through the AAP Friends of Children Fund.

 The world's largest research-based pharmaceutical company, Pfizer Inc. discovers, develops, manufactures, and markets prescriptions and is dedicated to discovering and developing new and better ways to prevent and treat disease and improve health and well-being for people around the world.

**Scott Gottlieb**  
On the left is the former FDA commissioner in charge of regulating Pfizer. On the right is a current member of the Board of Directors of Pfizer.

**Stephen Hahn**  
On the left is the former FDA commissioner in charge of regulating Moderna. On the right is the current Chief Medical Officer of Flagship Pioneering - the venture capital firm behind Moderna.

**James C. Smith**  
On the left is the CEO of Reuters in charge of informing people about the COVID-19 vaccines. On the right is a current member of the Board of Directors of Pfizer.

**Anthony Fauci**  
On the left is the NIAID Director under the National Institutes of Health. On the right is the funder of bioweapons research on gain of function bat coronaviruses at the Wuhan Institute of Virology.

## This is Christine Grady,

She is the head of "NIH Bio Ethics"  
They are the company that approves  
Drugs for the FDA.  
This is her husband...

Are you starting to get it?

## Mad Scientist Anthony Fauci Résumé

- Created the HIV/AIDS epidemic.
- Created Covid.
- Created multiple Influenza strains.
- Has pushed an experimental, and dangerous vaccine on society - including children.
- Has pushed masks and segregation on society - including children.
- His recommendation of Remdesivir/Ventilator has murdered thousands of Covid patients.
- It is now known he oversaw countless unneeded, and quite frankly - sadistic experiments on dogs and other animals.
- Has purposely withheld effective, safe, and proven treatments against Covid.
- Conducted experiments on HIV Positive Foster Children in NY.

New VAERS numbers have been published.

818,042 Adverse Events

127,641 Doctor Visits

83,412 Hospitalizations

92,017 Urgent Care

26,199 Disabled

10,179 Bell's Palsy

10,304 Myocarditis

8,408 Heart Attacks

2,631 Miscarriages

17,128 Deaths

Meanwhile, the fully vaccinated

continue to dominate infection,

hospitalization, and mortality rates.

....Nuremberg 2.0 awaits, SS Officer Fauci.

70 members of the Pfizer investment board are members of the Chinese Communist Party.

List of employers NOT requiring their employees to get vaccinated:

1. The White House
2. The CDC
3. The FDA
4. The WHO
5. Moderna
6. Pfizer
7. Johnson & Johnson

Wake up.

Pfizer has earned \$18.98 Billion in 2nd Quarter 2021

Their drug Eliquis, used for Blood Clots, rose 13%

Their drug Vyndaquel, used for Cardiomyopathy, is up 77%

## MANDATORY EXPLAINED 😐

If something is referred to as a "rule", a "guideline", or as "compulsory" or "mandatory", it is NOT A LAW.

You are not legally obliged to comply with it. Rules and guidelines and things labelled compulsory/mandatory require your active consent.

You cannot be forced by law enforcement officers or government as these things are not law.

"Officials" use this language to try and manipulate and frighten you into volunteering your consent - DO NOT GIVE IT.

### Is your employer mandating the Covid-19 Vaccine?

According to Federal Law 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(III), it is illegal to require an Emergency Use Authorized product. You have the right to refuse! Liberty First Legal is a nonprofit law firm that provides free legal assistance to those whose civil liberties are being threatened.

1. Go to <https://libertyfirst.legal>
2. Fill out the contact form.
3. Receive a legal letter notifying your employer of your right to refuse.

Just a handful of examples of officials in charge of the "health" of millions of people. Who besides Satan and a Libtard identifies with any of these creeps or would even want them taking out their trash? If you can't see the pain, sickness and pure evil in each of these psychos, you need help. I can't even look at these vermin, it makes me physically ill.

[Home](#) / [Newsroom](#) / [Q&A Detail](#) / [Coronavirus disease \(COVID-19\): Serology](#)

## Coronavirus disease (COVID-19): Serology

9 June 2020 | Q&A

### What is herd immunity?

Herd immunity is the indirect protection from an infectious disease that happens when a population is immune either through vaccination or immunity developed through previous infection. This means that even people who haven't been infected, or in whom an infection hasn't triggered an immune response, they are protected because people around them who are immune can act as buffers between them and an infected person. The threshold for establishing herd immunity for COVID-19 is not yet clear.

## Coronavirus disease (COVID-19): Serology, antibodies and immunity

13 November 2020 | Q&A

### What is herd immunity?

'Herd immunity', also known as 'population immunity', is a concept used for vaccination, in which a population can be protected from a certain virus if a threshold of vaccination is reached.

Herd immunity is achieved by protecting people from a virus, not by exposing them to it. Read the Director-General's [12 October media briefing speech](#) for more detail.

2. SARS-CoV-2, hereafter referred to as SARS-CoV-MIV, is a synthetic spike protein chimera engineered to attach to human ACE2 receptors and inserted into a recombinant bat SARS-CoV backbone. It is likely a live vaccine not yet engineered to a more attenuated state that the program sought to create with its final version. It leaked and spread rapidly because it was aerosolized and could effectively replicate in caves, but it was unable to infect bats yet, which is why it does not appear to infect bats. The reason the disease is so confusing is because it is less a virus than it is engineered spike proteins hitch-hiking a ride on a SARS-CoV quasispecies swarm. The closer it is to the final live attenuated vaccine form, the more likely that it has been deattenuating since initial escape in August 2019.

Also found in the Pfizer injection was Trypanosoma cruzi – a parasite of which several variants are lethal and is one of many causes of acquired immune deficiency syndrome or AIDS. It's not known if this was just a random ingredient or was purposefully placed and will be found in all Pfizer "vaccines."

Figure 10 shows a Trypanosoma cruzi, approximately 22 micrometers in length found in the so-called Pfizer "vaccine". It is composed of carbon, oxygen, phosphorus, sulphur, aluminum, chlorine and nitrogen.

Trypanosoma parasite found in the so-called Pfizer "vaccine"

assigned facilities what categories of healthcare personnel are eligible to receive the vaccine on each vaccination day.

10. Providers should keep diligent records of who has been vaccinated, and how many doses of the vaccine have been administered to that person. This is important because individuals who have received one dose of the vaccine will need to have a second dose of the vaccine as it becomes available. Communicate with PA DOH Immunizations Program which individuals in which COVID-facing units have received the vaccine. This is done by reporting through the Pennsylvania Statewide Immunization Information System (PA-SIIS), a requirement of becoming a COVID-19 vaccine provider.
11. Everyday assess the inventory of vaccines still available and determine the number of healthcare workers who still need to receive the vaccine. Continue to vaccinate until every healthcare personnel has been vaccinated and await further instructions from Pennsylvania Department of Health for Phase 1B.

**Vaccination of pregnant and breastfeeding HCP:**

Evidence suggests that pregnant people are potentially at increased risk for severe COVID-19-associated illness and death compared to non-pregnant people, underscoring the importance of disease prevention in this population. Given the predominance of women of child-bearing potential among the healthcare workforce, a substantial number of HCP are estimated to be pregnant or breastfeeding at any given time. Currently, there are no data on the safety and efficacy of COVID-19 vaccines in these populations to inform vaccine recommendations. Further considerations around use of COVID-19 vaccines in pregnant or breastfeeding HCP will be provided once data from phase III clinical trials and conditions of FDA Emergency Use Authorization are reviewed.

**Post-vaccination symptoms in HCP**

Based on available data, COVID-19 vaccination is expected to elicit systemic post-vaccination symptoms, such as fever, headache, and myalgias. While the incidence and timing of post-vaccination symptoms will be further informed by phase III clinical trial data, strategies are needed to mitigate possible HCP absenteeism and resulting personnel shortages due to the occurrence of these symptoms. ACIP recommends staggering delivery of vaccine to HCP in facilities so personnel from a single department or unit are not all vaccinated at the same time. Based on greater reactogenicity observed following the second vaccine dose in phase I/II clinical trials, staggering considerations may be more important following the second dose.<sup>viii</sup> Because Pennsylvania's approach prioritizes those who are high-risk COVID-19 healthcare personnel, this is expected to stagger initial vaccination somewhat across COVID-19 facing units.

**2020**

**SICK CLAIMS** Anti-vaxxers are already peddling bizarre theories about coronavirus vaccine claiming it's a plot to microchip the world

Catherine Giomo

If you still need a booster after being fully vaxxed... and still need to get tested after being fully vaxxed... and still need to wear a mask after being fully vaxxed... and still get hospitalized after being fully vaxxed, it's probably time that you admit that you've been conned.

9:26 PM · 1/2/22 · Twitter for iPhone

So let me get this straight.

COVID-19 barely mutated for a whole year but once the 'vaccines' were rolled out, suddenly a whole greek alphabet of new variants appeared...

BUT the unvaccinated people are to blame.

## What is the Shielding Approach<sup>1</sup>?

The shielding approach aims to reduce the number of severe COVID-19 cases by limiting contact between individuals at higher risk of developing severe disease ("high-risk") and the general population ("low-risk"). High-risk individuals would be temporarily relocated to safe or "green zones" established at the household, neighborhood, camp/sector or community level depending on the context and setting.<sup>1,2</sup> They would have minimal contact with family members and other low-risk residents.

**That special moment when u realize that Covid testers aren't quarantined after coming in contact with those who test positive**

**Most aren't vaccinating against covid, most are vaccinating against 'unemployment', 'public opinion' and 'loss of travel'**

**So what is more dangerous? The virus or the government?**

**German state allows all stores to exclude unvaccinated customers, including food and other everyday goods**

Things I'm worried about:

Losing my constitutional rights.

COVID-19

Trump won the election  
Babbitt was murdered  
McAfee didn't commit suicide  
Covid came from a lab  
Fauci knew  
Hydroxychloroquine worked  
Biden has dementia  
People are dying from the shot  
Hillary Clinton is a killer  
Masks are irrelevant  
It came from China  
BLM are terrorists

In times of great trials and tribulations, we should always defer to the U.S. Constitution. I often wonder how

**WHO Releases Plan For Global Digital Vaccine Passports Funded By Bill Gates & Rockefeller Foundation**

By: The European Union Times

The World Health Organization (WHO) has released a proposal backed by two major globalist organizations that serves as a blueprint for governments to implement a worldwide vaccine passport verification system.

The document, called "Digital Documentation of COVID-19 Certificates: Vaccination Status," funded by none other than the Bill & Melinda Gates Foundation and the Rockefeller foundation, describes the technical guidance for governments to roll out the program to use a global digital ID – in the name of COVIDID, of course.

"This document lays out an approach for creating a signed digital version of a vaccination record for COVID-19 based on a core data set of key information to be recorded, and an approach for the digital signature. The document leverages existing free and open standards, and is driven by the ethics, use cases and requirements for Digital Documentation of COVID-19 Certificates: Vaccination Status (DDCC-VS)."

This document is therefore software-agnostic and provides a starting point for Member States to design, develop and deploy a DDCC-VS solution for national use in whichever format best suits their needs (e.g. a paper card with a one-dimensional [1D] barcode or QR code stickers, or a fully functioning smartphone application developed internationally or locally)."

The primary target audience of this document is national authorities tasked with creating or overseeing the development of a digital vaccination certificate solution for COVID-19. The document may also be useful to

government partners such as local businesses, international organizations, non-governmental organizations and trade associations that may choose to support Member States in developing or deploying a DDCC-VS solution.

The DDCC-VS is intended for use at schools, at work, for international travel, and for contact tracing initiatives.

The document also shows its proposed vaccine passport template, with a QR code featuring the front, but the back in the top shows personal information about the number of vaccines received.

A similar vaccine passport project in the works, called CommonPass, is also backed by the Rockefeller foundation and the World Economic Forum (WEF).

It's notable how the only groups actively pushing for global vaccine passports are also the main proponents of the so-called Great Reset, a post-human plan outlined by WEF founder Klaus Schwab which seeks to deindustrialize the West, abolish private property, introduce biometric surveillance, and move humanity to a diet of bugs in the name of fighting climate change.

**Abortion Drugs Discovered in Bill Gates' Vaccines**  
Secret sterilization program discovered in Africa  
By Jay Greenberg on 10th June 2017 at 12:58pm

UNICEF, the World Health Organization, and the Bill and Melinda Gates Foundation have been accused of secretly sterilizing millions of women in Africa by doctors in Kenya after abortion drugs were discovered in Tetanus vaccines.

The CDC admitted the 98 million Americans who received the Polio vaccine were contaminated with the cancer causing virus known as SV40 or Simian Vacuolating 40. In the 2011 Supreme Court case of Bruesewitz versus Wyeth, they determined that the vaccine was contaminated with the SV40 virus.

By Allie Griffin  
June 15, 2022 | 8:03pm | Updated

Rep. Sean Casten mourned the loss of his 17-year-old daughter on Wednesday and said the teen died peacefully in her sleep. The Illinois Democrat released a heartbreaking statement that said his oldest daughter, Gwen Casten, went to her Sunday night and never woke

# September 17, 2021 – US Constitution Signing Day –

all flooded the phones, the emails and their us mailing addresses with the proper messaging?

FIND THEM HERE: [Elected Officials | USAgov](#)

September 17, 2021

Dear Joe Biden,

This is to inform you that I am filing a complaint against your illegal vaccine and all related unlawful mandates with the US Attorney General's office as a Deprivation of My Rights Under Color of Law. Let me help you understand how you, Dr. Fauci, and many other of your co-conspirators should be held accountable. At some point the tides will turn, WE THE PEOPLE, shall reclaim our government, legally, ethically, peacefully. When that happens, if the current US Attorney General does not take action on my (and many other fellow American) demands under Section 242 of Title 18, they will be replaced by one who will and to rekindle Nuremberg Code trials against you all.

**DEPRIVATION OF RIGHTS UNDER COLOR OF LAW:** The US Department of Justice. Section 242 of Title 18 makes it a crime for a person acting under color of any law to willfully deprive a person of a right or privilege protected by the Constitution or laws of the United States.

For the purpose of Section 242, acts under "color of law" include acts not only done by federal, state, or local officials within their lawful authority, but also acts done beyond the bounds of that official's lawful authority, if the acts are done while the official is purporting to or pretending to act in the performance of his/her official duties. Persons acting under color of law within the meaning of this statute include police officers, prisons guards and other law enforcement officials, as well as judges, care providers in public health facilities, and others who are acting as public officials. It is not necessary that the crime be motivated by animus toward the race, color, religion, sex, handicap, familial status or national origin of the victim.

The offense is punishable by a range of imprisonment up to a life term, or the death penalty, depending upon the circumstances of the crime, and the resulting injury, if any.

ADA: you are forcing – a discrimination scenario against Americans With Disabilities Act (ADA) – each of you may be fined up to \$75,000 for your first action that violates ADA. This is your first action. Second actions are \$150,000 fines; THIS IS A FEDERAL CRIME YOU ARE WILLFULLY COMMITTING. See: <https://www.ada.gov/index.html>

**FIRST AMENDMENT, US CONSTITUTION:** Freedom of expression cannot be suppressed or limited in any way. Muffling a voice, forcing the covering against the will of a citizen for freedom of their facial expression, even reducing their ability to breath and speak properly is a hindrance and violation. See: <https://www.mtsu.edu/first-amendment/article/1169/anti-mask-laws>

**FREEDOM OF MOVEMENT:** Our Founding Fathers believed this so sacrosanct a right, yet you are creating restrictions against it, including across state lines. Businesses will continue to close due to lack of restricted visitors and tourism, many will avoid, as you've planned, Democrat run cities who implement your illegal measures for your Dark Winter – like the plague you and your minions are to our Nation – increasing unemployment, homelessness, business foreclosure – all lost American dreams created by restrictions of movement. See: [https://en.wikipedia.org/wiki/Freedom\\_of\\_movement\\_under\\_United\\_States\\_law](https://en.wikipedia.org/wiki/Freedom_of_movement_under_United_States_law)

■ [ingersolllockwood.com](#)

IN ADDITION, LIKE NAZIS WHO WERE FOUND GUILTY AND GIVEN THEIR JUST PUNISHMENT,

YOU AND THOSE WHO HELP IMPLEMENT YOUR MANDATES ARE VIOLATING THE NUREMBERG CODE.

SEE:

<https://history.nih.gov/display/history/Nuremberg%2BCode>

You may try to silence my voice, that's why I have sent copies of this letter to thousands of fellow Patriots, my constitutional lawyer, my family and friends and I am healthy, have no plans to harm myself or anyone. I am peaceful and well aware of my legal rights. You will not silence the Awakened. WE THE PEOPLE have spoken. The Dark Winter, the toxic experimental vaccines, the first amendment violating face muzzle mask mandates, the lockdowns and all unconstitutional mandates by your Administration should lead to a lifetime in prison for you and your co-conspirators and an eternity in your own personal Dark Winter, with the Devil you worship.

You are hereby served and on notice – you have Awakened America.

*God Bless America and may God bring Justice to All of her Enemies both foreign and Domestic.*

## Opinion

## The Monkeypox Warning

June 11, 2003

[Give this article](#) [Share](#) [Save](#)

The outbreak of monkeypox in individuals who have handled exotic pets in the Upper Midwest and Northeast poses little danger to the general population -- there is no evidence it has spread from one human to another. But if it is not contained, the disease could become rooted in animal populations in this country.

And where monkeys actually live. See how stupid they think you are:

76. MATRIX DISASTER PROTOCOL, MARCH 2021 45  
2021 New York Reporting Project

## CHOOSING YOUR COVID-19 VACCINE FACTS YOU SHOULD KNOW

	Pfizer: \$4.7 billion in fines for false claims, drug and medical equipment safety violations, off-label promotion, corrupt practices, kickbacks, and bribery.
	Moderna: Has never brought a vaccine to market since its founding, despite fielding 9+ vaccine candidates, none of which made it through phase 3 clinical trials.
	Johnson & Johnson: Named in hundreds of thousands of lawsuits for toxic and/or dangerous products, including drugs, shampoos, medical equipment, and asbestos-contaminated baby powder.
	AstraZeneca: Suspended by two dozen European countries due to severe, lethal adverse reactions, like blood clots.

**DON'T WORRY, YOU'RE IN SAFE HANDS!**

If you're vaccinated, remember to wear a mask and socially distance because you can still spread COVID-19. Trust the Science™

Replying to @SammySilverCoin

## This is why your doctor gets aggressive.

Blue Cross Blue Shield pays your doctor a \$40,000 bonus for fully vaccinating 100 patients under the age of 2. If your doctor manages to fully vaccinate 200 patients, that bonus jumps to \$80,000.

But here's the catch: Under Blue Cross Blue Shield's rules, pediatricians **lose the whole bonus**

unless at least 63% of patients are fully vaccinated, and that includes the flu vaccine. So it's not just \$400 on your child's head—it could be the whole bonus. To your doctor, your decision to vaccinate your child might be worth \$40,000, or much more, depending on the size of his or her practice.

**AWAKEN**  
TO OUR AWFUL SITUATION

## SHOULD I GET A COVID VACCINATION?

By: @TheFree Thought Project

### Critical Thinkers

What's in it?  
Who developed it?  
Who manufactured it?  
What is their track record?  
Do they have legal liability?  
How long was it tested for?  
Who is telling me to get it?  
What is their track record?  
Is it effective?  
Is it necessary for my age?  
How many side effects reported?  
How many deaths reported?

### Mainstream Normies

The T.V. says we need "herd immunity."  
All my friends got cute stickers and a card.  
The T.V. says I should participate for the "greater good."  
Celebrities, athletes and musicians all tell me to get it.  
Government "experts" and politicians all tell me to get it.  
I don't want to be considered a conspiracy theorist.

Unvaxed Australia

Sherry Belinda · 7 h ·

The 36 year old self proclaimed "Queen of the Vaccine" SarahBeth Hartlage died "suddenly" last week.

Dr SarahBeth Hartlage urged people to take Covid vaccines.

She urged them online, in person, and in briefings with Louisville's mayor. She tweeted a picture of herself opening a box of mRNA jabs and said she'd had "a little visit from the Pfizer fairy." She was thrilled when regulators authorized shots for five-year-olds and disappointed when Pfizer postponed its application for six-month-olds.

**Austrian Constitutional Court Puts Gov't on Notice: 'Prove Pandemic Is Not a Scam or END Restrictions'**

 Fact checked

© February 1, 2022 by Sean Adi-Tabatabai 3 Comments

1.6K SHARES      

**The Austrian Constitutional Court has put the authoritarian government on notice: prove the Pandemic restrictions are not based on a lie, or end them immediately.**

What is currently happening with the COVID mandates and protests is nearly identical to what happened 135 years ago with the smallpox vaccine campaigns, where the vaccination made smallpox epidemics worse, the vaccines killed a lot of people, the public refused them and governments responded by harsher and harsher mandatory vaccination laws.

Eventually one of the largest protests of the century broke out in 1885, vaccine mandates were scrapped in one area in favor of alternative management of smallpox, and this is what actually ended smallpox.

**September 7th, 2020**

## Statement on Virus Isolation (SOVI)

**Isolation:** "The action of isolating; the fact or condition of being isolated or standing alone; separation from other things or persons; solitariness." —From the Oxford English Dictionary

The controversy over whether the SARS-CoV-2 virus has ever been isolated or purified continues. However, using the above definition, common sense, the laws of logic and the dictates of science, any unbiased person must come to the conclusion that the SARS-CoV-2 virus has *never* been isolated or purified. As a result, no confirmation of the virus' existence can be found. The logical, common sense, and scientific consequences of this fact are:

- the structure and composition of something not shown to exist can't be known, including the presence, structure, and function of any hypothetical spike or other proteins;
- the genetic sequence of something that has never been found can't be known;
- "variants" of something that hasn't been shown to exist can't be known;
- it's impossible to demonstrate that SARS-CoV-2 causes a disease called Covid-19.

In as concise terms as possible, here's the proper way to isolate, characterize and demonstrate a new virus. First, one takes samples (blood, sputum, secretions) from many people (e.g. 500) with symptoms which are unique and specific enough to characterize an illness. Without mixing these samples with ANY tissue or products that also contain genetic material, the virologist macerates, filters and ultracentrifuges i.e. *purifies* the specimen. This common virology technique, done for decades to isolate

pathogenic virus. Our research indicates that a single study showing these steps does not exist in the medical literature.

Instead, since 1954, virologists have taken unpurified samples from a relatively few people, often less than ten, with a similar disease. They then minimally process this sample and inoculate this unpurified sample onto tissue culture containing usually four to six other types of material — **all of which contain identical genetic material as to what is called a "virus."** The tissue culture is starved and poisoned and naturally disintegrates into many types of particles, some of which contain genetic material. Against all common sense, logic, use of the English language and scientific integrity, this process is called "virus isolation." This brew containing fragments of genetic material from many sources is then subjected to genetic analysis, which then creates in a computer-simulation process the alleged sequence of the alleged virus, a so called *in silico genome*. At no time is an actual virus confirmed by electron microscopy. At no time is a genome extracted and sequenced from an actual virus. This is scientific fraud.

The observation that the unpurified specimen — inoculated onto tissue culture along with toxic antibiotics, bovine fetal tissue, amniotic fluid and other tissues — destroys the kidney tissue onto which it is inoculated is given as evidence of the virus' existence and pathogenicity. This is scientific fraud.

From now on, when anyone gives you a paper that suggests the SARS-CoV-2 virus has been isolated, please check the methods sections. If the researchers used Vero cells or any other culture method, you know that their process was not isolation. You will hear the following excuses for why actual isolation isn't done:

1. There were not enough virus particles found in samples from patients to analyze.
2. Viruses are intracellular parasites; they can't be found outside the cell in this manner.

bacteriophages<sup>1</sup> and so-called giant viruses in every virology lab, then allows the virologist to demonstrate with electron microscopy thousands of identically sized and shaped particles. These particles are the isolated and purified virus.

These identical particles are then checked for uniformity by physical and/or microscopic techniques. Once the purity is determined, the particles may be further characterized. This would include examining the structure, morphology, and chemical composition of the particles. Next, their genetic makeup is characterized by extracting the genetic material directly from the purified particles and using genetic-sequencing techniques, such as Sanger sequencing, that have also been around for decades. Then one does an analysis to confirm that these uniform particles are exogenous (outside) in origin as a virus is conceptualized to be, and not the normal breakdown products of dead and dying tissues.<sup>2</sup> (As of May 2020, we know that virologists have no way to determine whether the particles they're seeing are viruses or just normal break-down products of dead and dying tissues.<sup>3</sup>)

If we have come this far then we have fully isolated, characterized, and genetically sequenced an exogenous virus particle. However, we still have to show it is causally related to a disease. This is carried out by exposing a group of healthy subjects (animals are usually used) to this isolated, purified virus in the manner in which the disease is thought to be transmitted. If the animals get sick with the same disease, as confirmed by clinical and autopsy findings, one has now shown that the virus actually causes a disease. This demonstrates infectivity and transmission of an infectious agent.

None of these steps has even been attempted with the SARS-CoV-2 virus, nor have all these steps been successfully performed for any so-called

2

If No. 1 is correct, and we can't find the virus in the sputum of sick people, then on what evidence do we think the virus is dangerous or even lethal? If No. 2 is correct, then how is the virus spread from person to person? We are told it emerges from the cell to infect others. Then why isn't it possible to find it?

Finally, questioning these virology techniques and conclusions is not some distraction or divisive issue. Shining the light on this truth is essential to stop this terrible fraud that humanity is confronting. For, as we now know, if the virus has never been isolated, sequenced or shown to cause illness, if the virus is imaginary, then why are we wearing masks, social distancing and putting the whole world into prison?

Finally, if pathogenic viruses don't exist, then what is going into those injectable devices erroneously called "vaccines," and what is their purpose? This scientific question is the most urgent and relevant one of our time.

We are correct. The SARS-CoV2 virus does not exist.

## Polio vaccines and the origin of AIDS

B F Elswood <sup>1</sup>, R B Stricker

Affiliations + expand

PMID: 7935079 DOI: 10.1016/0306-9877(94)90151-1

### Abstract

Although mass vaccination programs have resulted in the eradication of a number of human infectious diseases, vaccine contamination has been a persistent concern. In particular, it is now known that the early polio vaccines were contaminated with at least one monkey virus, SV40. The transfer of monkey viruses to man via contaminated vaccines is particularly relevant to the acquired immunodeficiency syndrome (AIDS), since the causative agent of AIDS, human immunodeficiency virus (HIV), is thought to be derived from a simian precursor virus. Furthermore, human infection with this virus appears to be a relatively recent event. We hypothesize that the AIDS pandemic may have originated with a contaminated polio vaccine that was administered to inhabitants of Equatorial Africa from 1957 to 1959. The mechanism of evolution of HIV from this vaccine remains to be determined.

**Smallpox vaccine 'triggered AIDS virus'**

By Pearce Wright  
Science Editor

The AIDS epidemic has been triggered by the mass vaccination campaign which eradicated smallpox.

The World Health Organization, which masterminded the 12-year campaign, is studying new scientific evidence suggesting that immunization with the smallpox vaccine may have triggered the associated, dormant human immune defence virus infection (HIV).

Some experts fear that in eliminating one disease, another disease was transformed from a minor endemic illness of the Third World into the current pandemic.

Most doctors accept that *Vaccinia* can activate other viruses; they are divided about whether it was the main catalyst for the AIDS epidemic.

But an adviser to WHO who disclosed the problem, told *The Times*: "I thought it was just a coincidence until we studied the latest figures. Now we can see that it must be caused by *Vaccinia*. Now I believe the smallpox vaccine theory is the explanation to the epidemic."

Further evidence comes from the Walter Reed Army Medical Centre in Washington.

While smallpox vaccine is no longer kept for public health purposes, it is still used by the American Armed services as a precaution against possible biological warfare. Routine vaccination of a 19-year-old recruit was found to stimulate a dormant HIV virus into AIDS.

This discovery of how people with subclinical HIV infection can trigger the rapid development of AIDS as a vaccine-induced disease was made by a medical team working with Dr Robert Redfield at Walter Reed.

The team had detected AIDS after vaccination had been healthy throughout high school. He was given multiple immunizations, followed by a full course of vaccination.

Two and a half weeks later he developed fever, headache, neck stiffness and night sweats. Three weeks later he developed a severe headache, confusion, meningitis and rapidly developed further symptoms of AIDS and died after responding for a short time to treatment.

**Aids epidemic 'triggered by smallpox vaccine'**

Continued from page 1

modified versions of the smallpox vaccine to combat other diseases in developing countries.

Other doctors who accept the connection between the anti-smallpox campaign and the AIDS epidemic have seen answers to questions which have baffled them. How, for instance, did the AIDS virus, previously regarded by scientists as "weak, slow and invisible", begin to behave like a type capable of creating a plague?

Many experts are reluctant to support the theory publicly because they believe it would be disastrous to the credibility of WHO.

In addition, they are concerned about the impact on other public health programs. Some vaccines, such as against diphtheria and the consumption of *Vaccinia* in potential AIDS patients.

The coincidence between the anti-smallpox campaign and the rise of AIDS was discussed recently last year by experts at WHO. The possibility was dismissed on grounds of unsatisfactory evidence.

Advisors to the organization much attention was being focused on AIDS by the media. It is not felt the doubts would have risen sooner if public health authorities had been more willingly reported infections to WHO.

Instead, some African countries denied the existence of AIDS even after US doctors alerted the world that the disease had spread to the United States.

However, as epidemiologists became more informed about AIDS from relatives of Central African countries, cases began to emerge from the non-vaccinating countries, and against the wealth of detail known about smallpox. A report in the *Journal of the World Health Organization* and *Report of the Global Commission on Smallpox Eradication* states:

"The smallpox vaccine theory would account for the position of each of the seven criteria for the theory of AIDS in the league table of most affected countries: why Brazil appears in the top ten Latin American countries; and why Haiti became the route for the spread of AIDS to the Americas."

The theory also explains why AIDS is more prevalent in Africa than in the West, and why there is less sign of infection among the 10-12-year-olds in Central Africa.

Needles were reused 40 to 60 times in the vaccination campaign. Waving the same across the face was the main, but perhaps not totally satisfactory method, of sterilization.

Although no detailed figures are available, WHO information on the AIDS league table of Central Africa matches the concentration of vaccinations.

On May 11, 1987, the London Times published an explosive article titled "Smallpox vaccine causes the AIDS virus." It has been suggested that the smallpox vaccination program promoted by WHO is responsible for the spread of AIDS in Africa. Almost 100 million Africans living in Central Africa have been vaccinated by the World Health Organization. The vaccine was blamed for awakening the "dormant" infection of the AIDS virus on the continent. The WHO consultant confessed: "Now I believe that the theory of the smallpox vaccine explains the explosion of (the incidence of) AIDS." Dr. Robert Gallo, one of the discoverers of HIV, told the Times: "The link between the WHO program and the epidemic is an interesting and important hypothesis."

### TAKE THE TEST Brits urged to get HIV tests as heterosexual diagnoses higher for first time in a decade

Terri-Ann Williams

13:02, 7 Feb 2022 | Updated: 14:02, 7 Feb 2022

BRITS have been urged to come forward for HIV tests after heterosexual diagnoses of the illness have overtaken those in gay men.

It's the first time the cases have shifted in decades and research shows that testing rates have dropped a third.

The Duke of Sussex appeared on a video call to encourage people to get tested for HIV (Picture: PA)

Chronological order:

1. PCR tests for Covid19 patented.
2. 2019 executive order on vaccines.
3. 5g tower rollout.
4. Covid plandemic.
5. Declaration of national emergency, FEMA
6. Ventilator production.
7. Remdesivir push.
8. Vaccine rollout (although previously created much earlier).
9. Booster shots.
10. HIV tests and more vaccines.

Cares act and tax payer dollars to fund it all along with fed created inflation. Evil stuff huh?

### Ignaz Semmelweis Hungarian Physician: 1847

In 1847, Ignaz Semmelweis was working as an assistant professor at Vienna's General Hospital Maternity Clinic. At that time, 10% of the women were dying after giving birth at his hospital, mostly due to infection. The interns at the hospital were routinely performing autopsies and delivering babies without any hand washing in between.

Semmelweis established a new policy of mandatory hand washing, and the mortality rate from infection dropped to one percent.

Rather than receiving praise for his pioneering and life-saving work, the medical community expelled him from the profession. Later, in 1865, his former co-workers tricked him into visiting a mental institution; he was admitted against his will. Semmelweis died mysteriously two weeks later.

10 years later, Louis Pasteur and Joseph Lister proved Semmelweis's work was sound.

**Semmelweis Reflex:**

Ivermectin (identified as curative in April 2020) works throughout all phases of illness because it both inhibits viral replication and modulates the immune response. Of note, chloroquine phosphate (Hydroxychloroquine, identified April 2020 as curative) is identified in the proposal as a SARS-CoV inhibitor, as is interferon (identified May 2020 as curative).

 DEFENSE ADVANCED RESEARCH PROJECTS AGENCY  
 675 NORTH RANDOLPH STREET  
 ARLINGTON, VA 22203-2114

The gene-encoded, or "mRNA," vaccines work poorly because they are synthetic replicates of the already-synthetic SARS-CoV-WIV spike proteins and possess no other epitopes. The mRNA instructs the cells to produce synthetic copies of the SARS-CoV-WIV synthetic spike protein directly into the bloodstream, wherein they spread and produce the same ACE2 immune storm that the recombinant vaccine does. Many doctors in the country have identified that the symptoms of vaccine reactions mirror the symptoms of the disease, which corroborates with the similar synthetic nature and function of the respective spike proteins. The vaccine recipient has no defense against the bloodstream entry, but their nose protects them from the recombinant spike protein quasispecies during "natural infection" (better termed as aerosolized inoculation).

@truthorlife I received the monoclonal antibodies when I first came down with the China virus, and was told that would be all I would need...it did not work!!!! I just thought the virus would run it's course.. Two weeks passed miserable and very short of breath and went to ER. MD just gave me an inhaler and some IV fluids. I kept asking if I needed anything else or the HCQ combo and was told no!! Same with another MD! 😞 Another week and I was declining and went to Urgent Care where I knew they would give me the HCQ, Ivermectin combo. Folks, it worked almost immediately and I feel saved my life!!! 🙌 Fuck 🙏 the ignorance of other medical professionals!! Take your health and freedoms into your own hands!!!
