

# **The Truth about the UN, CDC, WHO, WEF, (The Soros and other Elite Foundation) and Related Organizations**

## **The United Nations (UN): Declaring War on Independent Thought**

The UN has labeled conspiracy theorists as a greater threat than terrorists. They describe the rise of independent thought as "alarming and dangerous," launching a campaign titled "Stop the Spread of Conspiracy Theories." This initiative includes a toolkit designed to "debunk" and "expose" individuals questioning global elite motives. The UN asserts that events are not "secretly manipulated by powerful forces with negative intentions" and encourages the public to counter such claims with links to "fact-checking" sites. Critics argue this campaign undermines freedom of speech and choice, framing independent thinkers as societal threats.

## **The World Economic Forum (WEF): The "Age of Death"**

The WEF, under Klaus Schwab's leadership, is advancing policies aimed at dictating the end of life, starting with a proposed age limit of 70. These measures, labeled as part of "sustainable population" initiatives, have been criticized as a veiled attempt to centralize power and control human life.

### **Death Panels and Suicide Pods**

Under these policies, individuals reaching the age of 70 could face panels determining their worthiness to live. This system, critics claim, is genocide masquerading as healthcare. Once implemented, the criteria could expand to target disabled, ill, and dissenting individuals deemed "unproductive."

### **Economic Justifications for Human Extermination**

The WEF argues that such policies address issues like pensions, healthcare costs, and resource scarcity. Critics counter that this rationale reduces human lives to economic liabilities and promotes calculated extermination.

### **Media's Role in Propaganda**

Mainstream media supports these narratives by framing them as compassionate solutions, using terms like "death with dignity." Resistance to these ideas often results in silencing, deplatforming, and vilification of dissenters.

### **The Fight against Globalist Control**

Opponents believe the WEF's agenda aims to reduce humanity to a submissive population, solidifying elite dominance. They advocate rejecting globalist policies and supporting leaders who prioritize sovereignty and freedom.

## **The Great Reset: A Blueprint for Global Overhaul**

The WEF's "Great Reset" is described as a comprehensive transformation of the global order. Critics assert it consolidates power among unelected elites, undermining national sovereignty and individual freedoms.

### **The 2020 U.S. Presidential Election**

The 2020 election is viewed as a pivotal moment in this agenda. Former President Trump, an opponent of globalism, was seen as a significant obstacle to the Great Reset. Allegations of election interference, media bias, and the exploitation of the COVID-19 pandemic are cited as tactics to suppress dissent and advance globalist goals.

### **Pandemic as a Tool for Control**

The COVID-19 crisis enabled governments to impose lockdowns, destroy small businesses, and enforce mandates, stripping citizens of fundamental rights. The WEF framed these measures as part of a "new normal," criticized as a means of fostering compliance.

### **Financial Manipulation and Digital Currencies**

Central Bank Digital Currencies (CBDCs) are highlighted as tools for unprecedented economic control, aligning with the WEF's vision of a world where individuals "own nothing and are happy."

### **Climate Change and Education**

Climate change policies and educational reforms are described as mechanisms for controlling resources, limiting consumption, and suppressing independent thought, all under the guise of sustainability.

### **Depopulation Agenda: Tools of Control**

Critics claim the global elite employ various methods to reduce populations, including:

1. **Weather Modification:** Artificial disasters targeting food supplies and infrastructure.
2. **Illegal Immigration:** Overloading resources to destabilize societies.
3. **Fluoride and GMOs:** Allegedly reducing IQ and fertility.
4. **Pharmaceuticals and Vaccines:** Criticized as tools for weakening immunity and inducing infertility.
5. **Economic Manipulation:** Deliberate impoverishment to reduce birth rates.
6. **Environmental Toxins and Chemtrails:** Alleged use to spread infertility agents.
7. **Media and Entertainment:** Promoting unhealthy lifestyles and mental illness.

This alleged agenda traces back to the Global 2000 Population Reduction Plan, initiated during the Carter administration and influenced by the Club of Rome.

### **The Role of Donald Trump**

Donald Trump is viewed by critics of globalism as a key figure opposing the WEF's agenda. His leadership and policies are described as essential for preserving sovereignty and resisting elite control.

### **The Fight for Freedom**

Critics of the WEF and similar organizations advocate for public resistance, emphasizing the need for awareness and action to preserve individual rights and freedoms. They view the current trajectory as a battle not just for power but for the survival of humanity.
