

# **The Truth about Ukraine**

## **NOTAM Issued by Russia and Iran**

- Notices to Air Missions (NOTAM) have been issued by both Russia and Iran for an unspecified period in the coming days.

## **The Ukraine War: An Overview**

### **1. Strategic Objectives of the Deep State**

- The Ukraine war was orchestrated by deep state entities, including BlackRock, CIA, MI6, and Mossad, with the goal of using Ukraine as a proxy to fight Russia.
- The ultimate objective was to capture Moscow, dismantle the Russian Federation, and seize Russia's vast resources, including its GDP and \$75 trillion worth of natural assets, notably 175 million tons of lithium reserves.

### **2. Outcome of the Ukraine War**

- The deep state's operations in Ukraine have failed, as confirmed by multiple military assessments and statements from figures such as U.S. military Colonel Douglas Macgregor.
- Russia has achieved significant military successes, including the capture of Kyiv, Ukraine's second-largest city, and is advancing westward.
- Projections indicate that Russia could capture Odessa by mid-winter.

### **3. European and Global Perspectives**

- European nations are increasingly disillusioned with U.S. and Ukrainian war efforts and are withdrawing support.
- Military assessments and war game analyses conclude that the United States is economically incapable of sustaining conflicts on three fronts: Russia, China, and the Middle East.

## **Deep State's Response and Future Plans**

### **1. Shift to Fear-Mongering and Financial Manipulation**

- The deep state is intensifying efforts to promote narratives of an imminent World War III through mainstream media, aiming to incite fear and secure \$1.2 trillion in taxpayer funding for Israel.

### **2. Middle East Developments**

- Following setbacks in Ukraine, the deep state has shifted focus to the Middle East to create chaos, seek funding, and launder money.
- Turkey has turned against U.S. NATO allies, mobilizing troops and conducting naval exercises. Preparations are underway for emergency combat scenarios involving up to 2 million soldiers.
- Pakistan has aligned with Turkey, and both countries are receiving support from China.

## **Economic and Political Implications**

- The United States faces an economic collapse, further undermining its capacity to sustain multiple wars.
- Efforts to divert attention from domestic instability include promoting foreign conflicts and delaying potential military or political accountability for deep state actions.

## **Ukraine's Role in Deep State Operations**

### **1. Significant Figures and Networks**

- Figures like George Clooney and others are implicated in funding operations benefiting Volodymyr Zelensky. The persistent conflict in Ukraine shields the deep state's illicit activities, preventing exposure that would spell their downfall.
- Beyond Biden and Obama, the network encompasses high-ranking officials like Nancy Pelosi, Hillary Clinton, and others, spanning governments and secret organizations globally, including Israel.

### **2. CrowdStrike and Congressional Corruption**

- CrowdStrike, a deep state cybersecurity company, has played a pivotal role in election interference and data manipulation. Their servers, located in Ukraine, represent a national security threat.
- Key individuals linked to Ukrainian money laundering include:
  - Kevin McCarthy
  - Steve Cohen
  - Diana Harshbarger
  - John Axne
  - Dwight Evans
  - Fred Upton
  - Others named in previous investigations.

### **3. Biolabs and Corruption**

- Barack Obama, Joe Biden, and other figures facilitated biolab setups, money laundering, and financial exploitation in Ukraine.

## **Conclusion**

- The Ukraine conflict has marked a strategic failure for deep state objectives.
- Attempts to pivot towards other global conflicts signify a broader effort to regain control and resources amid increasing global resistance to U.S.-led interventions.
